What You Will Learn

The Bachelor of Science in Health Care Administration program is intended to develop critical thinking abilities, communication competence and leadership capacity with an advanced understanding of health care management services and delivery. It is a degree-completion program designed for health care professionals. The program is offered online so that students can balance their personal and professional responsibilities while working to attain their degree.

Program Requirements

If you're interested in earning your bachelor's degree in health care administration with Pima Medical Institute, you must have a high school diploma or recognized equivalency, hold a health science associate degree and have completed a total of 64 semester credits at the postsecondary level.*

Job Outlook

According to the U.S. Bureau of Labor Statistics, employment of medical and health services managers is projected to grow 32 percent from 2020 to 2030, much faster than average for all occupations. As the large baby-boom population ages and people remain active later in life, there should be increased demand for healthcare services.**

Employment

Most medical and health services managers work full-time in offices at health care facilities, such as hospitals, nursing homes and group medical practices.

*The 64 credits must include 14 general education credits, 26 health science credits and 24 related credits.
