PIMA MEDICAL INSTITUTE

Admissions Requirements

Admissions Overview:

Prospective students must satisfy the admissions requirements outlined in the catalog (e.g., proof of high school graduation or equivalent) and meet the program's entrance exam requirements (see below). For general admission requirements, refer to the academic catalog.

- A minimum score of 20 on the Wonderlic ® exam*
- A minimum of 80% (24 out of 30 points) on the math test*

Note: An average is calculated for multiple attempts in a 12-month period for cut score calculations

Once the candidate has met the initial requirements, the candidate will be notified of the next steps. Please note that, depending on the volume of applicants and available openings for the program, it is possible that qualified candidates may not be invited to interview for an upcoming start. The following items are not required but are awarded points as part of the interview. These documents should be submitted prior to the interview.

- Calendar for Success (Appendix A)
- College transcripts OR proof of post-secondary degree completion OR relevant military training

Following the interview, the program director will combine the Wonderlic, Math, and Interview scores to determine eligibility. Based on the candidate's total score, one of the following statuses will be identified:

- Accepted: meets the cut score (90+ points on interview, Wonderlic and Math combined)
- Accepted-Waitlist: meets the cut score, but there are no seats available in the next program start date
- Unconfirmed: did not meet the initial cut score, but will be invited back to perform an additional learning activity to determine eligibility (75-89 points on interview, Wonderlic and Math combined)
- Denied: did not meet the cut score OR qualify for the additional learning activity (<75 points on interview, Wonderlic and Math combined)
