East Valley Hours of Operation

Revision Date: 1/1/26

Hours of Operation:	7:30 AM - 9:50 PM Monday through Thursday and 7:30 AM – 5:00 PM Friday
Class Schedule:	Morning Classes:
	8:00 AM - 12:00 PM Monday through Friday (for certificate programs except Phlebotomy Technician and Nursing Assistant programs)
	8:00 AM - 12:00 PM Monday through Thursday (Phlebotomy Technician)
	8:00 AM - 12:15 PM Monday through Friday (Nursing Assistant)
	Afternoon Classes:
	12:30 PM - 5:30 PM Monday through Thursday (for certificate programs except Nursing Assistant, Phlebotomy Technician, and Veterinary Technician programs)
	1:00 PM - 5:00 PM Monday through Thursday (Phlebotomy Technician)
	1:00 PM - 5:00 PM Monday through Friday (Veterinary Technician)
	12:45 PM - 5:00 PM Monday through Friday (Nursing Assistant)
	Night Classes: 5:30 PM - 9:50 PM Monday through Thursday (for certificate programs except Nursing Assistant program)
	5:30 PM - 9:45 PM Monday through Friday (Nursing Assistant)
Student Breaks:	10 minutes per hour, not exceeding 40 minutes per 4 hours
Mealtimes:	Pima Medical Institute does not provide "mealtime", however students are welcome to eat meals during student breaks

East Valley Scholarship Information

Revision Date: 2/23/26

Sam's Squad: A Scholarship for a future Veterinary Technician

One (1) $25,000 scholarship will be awarded to a current Veterinary Assistant or Veterinary Technician student enrolled at the East Valley campus, decided by a scholarship committee.

Scholarship Applicants must:

• Be actively enrolled in either the Veterinary Assistant or Veterinary Technician program, entering their first or second professional sequence (VTA) or their second or third professional sequence (VTT).

• Have a 3.0 minimum GPA.

• Have attendance at 85% or higher.

• Submit a 1-3 page essay outlining why you chose the Veterinary field, your educational and career goals, any community service you are involved in, and why you believe you deserve this scholarship.

Qualified applicants must submit their information and essay to East Valley Campus Director Rodney Fitzsimmons (rfitzsimmons@pmi.edu) by March 15, 2026.

Grievance and Discrimination Policy

I. Purpose

To provide an avenue of due process for students who do not agree with the Institution's (Pima Medical Institute) determinations.

II. Additional Authority

U.S. Department of Education (USDE), Accrediting Bureau of Health Education Schools (ABHES), Accreditation Council for Occupational Therapy Education (ACOTE), Commission on Accreditation of Allied Health Education Programs (CAAHEP), Commission on Dental Accreditation (CODA), Commission on Accreditation for Respiratory Care (CoARC), Commission on Accreditation in Physical Therapy Education (CAPTE), Commission on Dental Accreditation (CODA), Joint Review Committee on Education in Radiologic Technology (JRCERT), Arizona State Board for Private Post Secondary Education (AZPPSE), California Board for Private Postsecondary Education (BPPE), Colorado Higher Education Department Division of Private Occupational Schools (DPOS), New Mexico Higher Education Department (NMHED), Nevada Commission on Postsecondary Education (CPE), Texas Workforce Commission (TWC), Washington Training and Education Coordinating Board (WTECB), Washington Student Achievement Council (WSAC), and state boards of nursing (BON)

III. Responsible Party(ies)

Staff, faculty, and students

IV. Policy Statement

Student concerns should first be addressed by the faculty or program director or through student services. When a concern is not sufficiently addressed to the student's satisfaction, a formal written complaint may be initiated following the procedures outlined in this policy.

V. Definitions

A. Grievance
   1. Dissatisfaction or disagreement with an outcome or situation that a student believes to be incorrect or unjust. This occurs after the student has made a reasonable attempt to resolve the issue through direct engagement with the appropriate individuals, such as faculty members or program leadership, but remains unsatisfied with the resolution.

B. Cohort
   1. Group of students who started a program on the same day and who progress through the program based on the published schedule; students who withdraw, take a leave of absence, etc., may return to the same program but with a different cohort of students.

VI. Policy

A. Attempts to Address
   1. Prior to submitting a complaint, the student is expected to attempt a resolution within the academic program by communicating with staff (i.e., faculty, lead faculty, program director).
   2. If a satisfactory solution cannot be reached between the student and the academic staff, then the student may submit a formal complaint in writing to the Assistant Dean of Faculty, the Campus Director, or designated personnel.

B. Types of Grievance
   1. Academic Performance Concerns
      a. Student academic concerns, such as performance outcomes (e.g., PPS, or failing a course, skills exam, or clinical education) that cannot be resolved through discussion with the faculty, program director, or lead faculty).
   2. Termination
      a. Students who have been terminated from a program may appeal the decision in writing within 10 business days of the termination date.

i. There is no guarantee that the student will be able to return to the same cohort and may have to re-enter or re-enroll into a different cohort.

3. Discrimination Complaint:
   a. Complaints alleging discrimination in the on the basis of race, national origin, color, gender, disability, age, religion by students, staff, or third parties, or applicable legally protected characteristics.
   b. For discrimination based on sex-based offenses, please refer to PMI-054: Title IX Sex-Based Reporting or PMI – 055: Title IX Sex-Based Offenses Reporting (Texas Campuses Only)
4. Other
   a. Students may submit a complaint for any concern that does not fall within one of the defined categories (e.g., faculty and staff performance, facilities and resources, administrative services complaints).

C. General Guidelines
1. Retaliation is forbidden and any individual engaging in retaliatory conduct will be disciplined.
2. Conflict of interest, or the appearance of a conflict of interest during any stage of the grievance process, will not be tolerated.
3. The student's (i.e., claimant) identity will be kept confidential as much as possible. However, it may be necessary to release the student's name to the accused in order to fully investigate the grievance or complaint.
4. Sanctions can range from a written reprimand to expulsion from the school in the case of a student, or termination from employment in the case of an employee, depending on the nature and severity of the allegations.

D. Recordkeeping
1. All Campus Directors are required to maintain a student complaint file in the PMI approved network location that includes a copy of the formal written complaint, details of the investigation (including personnel involved), and notes regarding the final decision.
2. For degree programs, the program's accrediting agency may require a copy of any formal complaints; a record must be kept on file for the length of time designated by the programmatic and/or institutional accreditor, whichever is longest.

E. Publication of Policy
1. The Grievance and Discrimination process must be published in the catalog, the PMI website, and every degree program's Student Handbook, and the Practical Nursing Student Handbook.

VII. Formal Written Grievance Procedure

A. Formal Written Grievance
1. Student grievances are to be submitted in writing and include the substance of the grievance to official personnel:
   a. On Ground Campus: Student grievances are to be submitted in writing to the Associate Campus Director, Assistant Dean of Faculty, or the Campus Director.
   b. Online: Student grievances are to be submitted in writing to the Online Student Success Manager, who may assign the grievance to the most appropriate home office official.
2. Recipient response:
   a. The recipient or designated official will investigate the claim and make an appointment with the claimant within 10 business days of receipt.
   b. The recipient will notify the claimant of the decision within 10 business days of the meeting.
   c. If the recipient does not respond within the time frame defined in this policy, the claimant can submit a Grievance Outcome Appeal.

B. Grievance Outcome Appeal
1. If the grievance is still unresolved after meeting with the campus director, Dean of Online Education, or designated official, the student may call the home office contact (below), submit a Grievance Appeal form via the Student Portal, or send written correspondence to the attention

of the Regional Director of Operations (RDO) or Director of Online Education for distance education programs:

a. **West Region** (Chula Vista, East Valley, Mesa, Phoenix, Renton, San Marcos, Seattle, Tucson)
    i. DeWayne Johnson, Regional Director of Operations
    Address: 111 Campus Way, San Marcos, CA 92078
    Phone: (760) 299-4520
b. **East Region** (Albuquerque, Aurora, Colorado Springs, Denver, El Paso, Houston, Las Vegas, San Antonio)
    i. Tara Dailey, Regional Director of Operations
    Address: 5725 Mark Dabling Boulevard, Suite 150, Colorado Springs, CO 80919
    Phone: (719) 637-4077
c. Online
    i. Michele Poulos, Director of Online Education
    Address: 40 N Swan Road, Suite 100, Tucson AZ 85711
    Phone: 520-318-2466 x 11401
d. Complaints submitted via mail may require an additional 10 business days beyond the defined timelines in this policy.

2. Grievances are to be submitted in writing to the appropriate person identified in VII. B. 1; submissions must include:
    a. Substance of the grievance
    b. Attempts to address or resolve
    c. Requested resolution
3. Recipient Response
    a. The recipient or designated official will attempt to contact the complainant as soon as able but no later than 10 business days from receipt of the appeal request.
    b. The recipient will conduct an impartial investigation within 10 business days of the student meeting, which will include a review of all relevant documents and additional records that may not have been included in the appeal (appeals submitted via mail may take an additional 10 days).
    c. Following the investigation timeframe, the recipient will schedule a meeting with the student.
    d. During or after the investigation, at the request of the complainant, PMI will consider various options to protect the complainant, including but not limited to:
        i. Health and mental services
        ii. Academic support
        iii. Opportunity to retake the class
        iv. Withdraw without penalty
4. Decision on Appeal
    a. The recipient or designated official will notify all parties of the decision on the appeal within 30 business days (appeals submitted via mail may take an additional 10 days).
    b. If the investigation determines that discrimination has occurred, corrective action will be taken, including consequences imposed on the individual found to have engaged in the discriminatory conduct, individual remedies offered or provided to the subject of the complaint, and/or staff or student training and/or other systemic remedies as necessary to prevent it from reoccurring.
    a. If the investigation will take longer than 30 days, all parties will be apprised of the steps being taken.

C. Filing a Grievance with an Outside Agency

1. The student may find that the institution's grievance process leads to a personalized resolution of the concern; however, nothing in this policy prevents a student from filing a complaint with the appropriate state, programmatic, institutional accreditation agency prior to or in lieu of following PMI's Grievance and Discrimination Policy.
    a. Each state, programmatic, or institutional accreditation agency has specific procedures for filing a grievance. Students are advised to contact the agency directly to ensure proper filing of the concern.

State of AZ Grievance Procedure Requirements

Revision Date: 1/1/26

If the complaint cannot be resolved after exhausting PMI's grievance procedure, the students may file a complaint with the appropriate state or accrediting agency listed on pages 18-23 of the 2026-2027 Academic Catalog. Arizona sudents have the right to file a complaint to the Arizona State Board of Postsecondary Education under A.R.S. § 32-3052(contact info below)

Arizona State Board for Postsecondary Education

1740 West Adams Street, Suit 3008

Phoenix, AZ 85007

Phone: (602) 542-5709

Website: https://ppse.az.gov

Arbitration of a student grievance is required. Arbitration will take place at a location reasonably convenient for both parties giving due consideration to the student's ability to travel and other pertinent circumstances. Both parties will attempt to have proceedings take place within a reasonable time and without undue delay. The arbitration proceedings will follow the spirit if not the letter of the consumer due process protocol of the American Arbitration Association. The protocol includes but is not limited to a fundamentally fair process; an independent and impartial, competent, and qualified arbitrator; independent administration of the arbitration; reasonable cost; right to representation; and possibility of mediation. Arbitration does not preclude other avenues of recourse, including but not limited to possible relief in small claims court, unless and until the arbitration result is made binding. Arbitration of a student grievance does not preclude the student from seeking a remedy from the Arizona Board of Private Postsecondary Education.

Custom Publications by Program

Pima Medical Institute (PMI) books listed for each program are considered mandatory. These texts are custom publications for PMI and cannot be purchased in a retail setting.

Veterinary Technician (VTT)	**$20,789.00**	18,624.00	-	1,600.00	205.00	360.00	7	$384.00	48.5/1055	47/52	5/225

*Includes Tax @ 8.3%

† Hybrid Programs: Students enrolling will have the option to purchase a laptop for an additional fee.

The total technology fee included in the Tuition Price List is the combined cost of charges for each enrollment period of the program, as published in the PMI Catalog. For example, a $600.00 technology fee for a five-semester program would equal a semester charge of $120.00. For term-based programs, students attending the program outside of the published length (e.g., course retakes or a reduction in course load for an online program) will continue to be charged a technology fee based on each additional semester in which the student is enrolled in the program.

The registration fee is charged for each enrollment, unless returning to the same program within 180 days.

***The uniform fee includes the cost associated with the required dosimeter in applicable programs.*

Additional student expenses may include, but are not limited to required immunizations, health insurance, background check, drug screening, clinical registration fees, and travel/parking expenses related to clinical externships or field trips. Please contact the campus administrator for additional information.

Attendance Awards	177	Absences due to military duty and/or civic duty requirements must still be recorded as an absence in the system; however, absences that do not exceed 14 days will not impact a student's eligibility for perfect attendance awards.	Updated	Absences due to Military DutyEnrolled students who are members of the United States Armed Forces (including National Guard, Reserves, or Active Duty) who are unable to attend class for less than 14 days due to military obligation, will be afforded excused absences.If the dates are known in advance, the student must notify their Program Director (if applicable), instructor(s), and student services within 10 days of receiving orders. If the dates are not known, the student must provide notification as soon as they are available.The student must submit their orders and a copy will be uploaded into CReaM (or attached to the form).
Absence	177	Students enrolled into the San Marcos campus Phlebotomy Technician program that miss any scheduled classroom or laboratory hours must attend scheduled make-up classes or tutoring sessions to cover any missed course content. Make-up classes or tutoring sessions do not remove the classroom absence from the student's record and will still count toward attendance advisement, attendance warning, and termination thresholds.	Updated	Students enrolled into the Phlebotomy Technician program that miss any scheduled classroom or laboratory hours must attend scheduled make-up classes or tutoring sessions to cover any missed course content. Make-up classes or tutoring sessions do not remove the classroom absence from the student's record and will still count toward attendance advisement, attendance warning, and termination thresholds.

Academic Schedule	172-173	Class Starts, Postponements Class starts occur at various times throughout the year; schedules are published in catalog addenda, which are available at each campus. Class postponements by the School within 30 days of the original starting date will not alter the terms and conditions of the enrollment agreement. However, class postponements by the School beyond 30 days of the original starting date will terminate the enrollment agreement with all monies paid by the student to be refunded in full.	Updated	Class Starts, Postponements Class starts occur at various times throughout the year; schedules are published in catalog addenda, which are available at each campus. Class postponements by the School within 30 days of the original starting date will not alter the terms and conditions of the enrollment agreement. However, class postponements by the School beyond 30 days of the original starting date will terminate the enrollment agreement with all monies paid by the student to be refunded in full. Postponement clause: Postponement of a starting date, whether at the request of the school or the student, requires a written agreement signed by the student and the school. The agreement must set forth: a. Whether the postponement is for the convenience of the school or the student; and, b. The deadline for the new start date, beyond which the start date will not be postponed. If the course is not commenced, or the student fails to attend by the new start date set forth in the agreement, the student will be entitled to an appropriate refund of prepaid tuition and fees within 30 days of the deadline in accordance with the school's refund policy and all applicable laws and Rules concerning the Private Occupational Education Act of 1981.

Leave of Absence	178	Leave of Absence Certificate (Non-Term-Based) Programs Students may request a leave of absence (LOA) for circumstances that will require a prolonged absence. Students must complete Sequence one (1) in their program to be eligible for an LOA and, prior to granting LOA status, the School must determine if there is a reasonable expectation that the student will return from the leave. Students requesting LOA must complete a Leave of Absence Request form available from the campus Student Services Department. An LOA may be granted for up to a maximum of 180 days in a 12-month period. Students may request more than one LOA during a 12-month period provided the total time granted does not exceed 180 days. Time spent during an approved LOA is not considered accrued time for a course or program. When calculating the maximum time frame for a student's approved LOA, the School ensures that it accounts for all periods of nonattendance (including weekends, holidays, and scheduled breaks). Program changes may occur while a student is on a leave of absence; when students return, they may be required to complete specific courses in the curriculum prior to progressing in the program. Students who do not complete the LOA request form, and are not attending scheduled courses, are marked absent and will be terminated if the number of absences exceeds 14 consecutive calendar days (including weekends, holidays, and scheduled breaks). Degree (Term-Based) Programs Students in degree programs are not eligible for LOA. Students who have successfully completed	Updated	Leave of Absence Students may request a leave of absence (LOA) for circumstances that will require a prolonged absence. The request for an LOA must meet the Department of Education criteria (34 CFR 668.22(d)) including medical leave (including pregnancy), family care, military duty, and jury duty. Students requesting LOA must complete an LOA Request form available from the campus Student Services Department. Students must have successfully completed at least one course prior to requesting an LOA. Prior to granting LOA status, the School must determine if there is a reasonable expectation that the student will return from the leave. An LOA may be granted for up to a maximum of 180 days in a 12-month period. Students may request more than one LOA during a 12-month period provided the total time granted does not exceed 180 days. Time spent during an approved LOA is not considered accrued time for a course or program. When calculating the maximum time frame for a student's approved LOA, the School ensures that it accounts for all periods of nonattendance (including weekends, holidays, and scheduled breaks). Program changes may occur while a student is on a leave of absence; when students return, they may be required to complete specific courses in the curriculum prior to progressing in the program. Students who do not complete the LOA request form, and are not attending scheduled courses, are marked absent and will be terminated if the number of absences exceeds 14 consecutive calendar days (including weekends, holidays, and scheduled breaks). Failure to return from an approved leave of absence will result in

		all active modules in the term but who have an academic interruption may be eligible to sign a letter of intent without having to withdraw from the program.		withdrawal from the program. There may be limitations on LOA eligibility for students enrolled in term-based programs due to scheduling requirements. This is due to the requirement that a student must return into the same classes when returning from an LOA. Students may not apply for an LOA between terms, they are only eligible if they start an LOA during a term. An LOA may have an impact on financing, including aid and loans. Contact the student finance office for more information about the impact of an LOA on financial aid.

PMI Campus Information

Revision Date: 5/7/26

Campus	Catalog Pages	Current Catalog Statement	Action	New or Revised Catalog Statement
Chula Vista, CA	10	Description of Facilities: The Chula Vista Campus occupies approximately 24,000 square feet and is divided into nine major instructional areas. Each area contains appropriate instructional equipment and furniture. English as a Second Language Instruction is not offered by Pima Medical Institute, Chula Vista, CA. The Veterinary Technology separate educational center located at Chula Vista Animal Care Facility, 130 Beyer Way, is equipped with American Veterinary Medical Association essential equipment including a full surgical suite, surgical prep area, radiology room, clinical laboratory equipment and animal holding areas. The adjacent Veterinary Technology classroom includes clinical laboratory equipment, microscopes, a surgical instrument prep and sterilization area as well as student desk top computers.	Updated	Description of Facilities: The Chula Vista Campus occupies approximately 24,000 square feet and is divided into nine major instructional areas. Grants	182	Grants For PMI students, options may include the Federal Pell Grant and the Federal Supplemental Educational Opportunity Grant. The Cal Grant, which is a state grant, is also an option for PMI California students. Federal Pell Grant (Pell Grant) For many students, Pell Grants provide a “foundation” of financial aid to which other aid may be added to defray the cost of college education. These grants are awarded only to undergraduate students who have not earned a bachelor degree or professional degree. Each student is entitled to apply for a Pell Grant; eligibility is determined by a student’s need, COA, and amount of money appropriated by Congress to fund the program. The grant amount is determined by a standard formula used by the USDE. The grant award will depend on the SAI, COA, and the Pell Lifetime Eligibility Used. To apply for a Pell Grant, students or prospective students may complete a Free Application for Federal Student Aid (FAFSA) form available through the PMI Financial Services Department, from high school counselors, or website https://studentaid.gov/h/apply-for-aid/fafsa. The application is transmitted electronically through the FAFSA Processing System (FPS), which determines the applicant’s SAI. Federal Supplemental Educational Opportunity Grant (FSEOG) Undergraduate students with the lowest SAI and who will also receive Pell Grants for the award year have primary consideration for an FSEOG award. The amount of the grant and the number of students who may receive this grant depends on the availability of funds from the	Updated	Grants For PMI students, options may include the Federal Pell Grant and the Federal Supplemental Educational Opportunity Grant. Federal Pell Grant (Pell Grant) For many students, Pell Grants provide a “foundation” of financial aid to which other aid may be added to defray the cost of college education. These grants are awarded only to undergraduate students who have not earned a bachelor's degree or professional degree. Each student is entitled to apply for a Pell Grant; eligibility is determined by a student’s need, COA, and the amount of money appropriated by Congress to fund the program. The grant amount is determined by a standard formula used by the USDE. Eligibility for the Federal Pell Grant is based on a student’s Student Aid Index (SAI) and other federal criteria. Students whose SAI equals or exceeds twice the maximum Pell Grant amount for the award year are generally not eligible for Pell Grant funding. However, students meeting the Special Rule for dependents of certain deceased servicemembers or public safety officers as defined by federal law may still qualify for a Pell Grant. To apply for a Pell Grant, students or prospective students may complete a Free Application for Federal Student Aid (FAFSA) form available through the PMI Financial Services Department, from high school counselors, or the studentaid.gov website. The application is transmitted electronically through the FAFSA Processing System (FPS), which determines the applicant’s SAI. Direct Subsidized Loans	183	Direct Subsidized Loans These low-interest loans are available to undergraduate students with financial need; the borrowed amount may not exceed the financial need. The USDE pays the interest on these loans while the student is in school at least half-time, for the first six months after the last date of attendance (i.e., the grace period) and during a period of deferment. Deferments after the student drops below half-time status are not automatic, and the student must contact the lender concerning their loan. Applications and deferment information can be obtained from the PMI Financial Services Department or from the lender. Dependent undergraduate students may borrow up to: • $5,500 if they are in their first year and enrolled in a program of study that is at least a full academic year3 (at least $2,000 of this amount must be in unsubsidized loans) • $6,500 if they have completed the first year of study and the remainder of their program is at least a full academic year (at least $2,000 of this amount must be unsubsidized loans) • $7,500 a year if they have completed two years of study and the remainder of their program is at least a full academic year (at least $2,000 of this amount must be in unsubsidized loans) For periods of undergraduate study that are less than an academic year, the amounts the student can borrow will be less than those previously listed. Students may ask the PMI Financial Services Department for specific details. The aggregate loan limit for a dependent undergraduate student is $31,000 (no more than $23,000 of this amount may be subsidized loans). Independent students or a dependent undergraduate students whose parents are unable to qualify for a PLUS Loan may borrow up to: • $9,500 if the student is a first-year student enrolled in a program of study that is at least a full academic year (at	Updated	Direct Subsidized Loans These low-interest loans are available to undergraduate students with financial need; the borrowed amount may not exceed the financial need. Direct Unsubsidized Loans	183-184	Direct Unsubsidized Loans https://studentaid.gov/understand-aid/types/loans/subsidizedunsubsidized These loans are available to eligible students, regardless of family income, who do not qualify in whole or in part for Direct Subsidized Loans. The loan is not awarded based on need; the term “unsubsidized” means that interest is not paid for the student. The student may make monthly or quarterly interest payments to the lender or allow the accrued interest to capitalize. The terms of these loans are the same as those for a Direct Subsidized Loan with the following exceptions: • Federal government does not pay interest on student’s behalf • The student must pay all interest that accrues on the loan during enrollment and the grace period. The student may make monthly or quarterly interest payments to the lender or allow the accrued interest to capitalize. Direct PLUS Loans https://studentaid.gov/plus-app/ These federal loans are available to graduate or professional students (grad PLUS loans) or parents of dependent undergraduate students (parent PLUS loans) to help pay for education expenses not covered by other financial aid. Parents of dependent students include the biological or adoptive parent(s). The parent PLUS loan is also available to stepparents if their income and assets are taken into consideration when calculating the student’s SAI. The USDE makes Direct PLUS Loans to eligible parents and graduate or professional students through schools participating in the Direct Loan Program. The maximum amount awarded is the cost of attendance (per the School’s determination) minus any other financial aid; the loan cannot exceed the student’s cost of education. The interest rate is variable and is set on July 1 of each	Updated	Direct Unsubsidized Loans These loans are available to eligible students, regardless of family income, who do not qualify in whole or in part for Direct Subsidized Loans. The interest rate is variable and is set on July 1 of each year. A loan fee will be deducted proportionately each time a loan disbursement is made. For information on loan fees, see: https://studentaid.gov/understand-aid/types/loans/interest-rates." Students should report to the PMI Financial Services

Section	Catalog Pages	Current Catalog Statement	Action	New or Revised Catalog Statement
		year. A loan fee will be deducted proportionately each time a loan disbursement is made. For information on loan fees, see: https://studentaid.gov/understandaid/types/loans/interest-rates. To receive a grad PLUS loan, the student must be a graduate or professional student enrolled at least half-time in an eligible program leading to a graduate or professional degree or certificate, have no adverse credit history, and meet the general eligibility requirements for federal student aid. To apply for grad PLUS loan, contact the PMI Financial Services Department. Repayment of a Direct PLUS Loan begins within 60 days of the final disbursement unless the parent qualifies for and is granted a deferment by the lender. There is no grace period on these loans. Interest begins to accumulate at the time the first disbursement is made, and parents will begin repaying both the principal and interest while the student is in school. Applications can be obtained from PMI's Financial Services Department or from the lender. For deferment information, contact the PMI Financial Services Department. Loan Advisement The USDE requires that any student receiving a Direct Loan be notified concerning their loan. PMI advises each student regarding loan indebtedness and gives first-time borrowers an entrance counseling and all students an exit interview regarding the loan to make sure the student understands the amount borrowed and the student's rights and responsibilities regarding repayment. Students should report to the PMI Financial Services Department prior to reducing course load below half time, withdrawal, or graduation for loan advising. The purpose of this session is to inform students of their tentative total loans received while in attendance at PMI		Department prior to reducing course load below half time, withdrawal, or graduation for loan advising. The purpose of this session is to inform students of their tentative total loans received while in attendance at PMI and refunds that may be made. The session also provides students with an estimated payment schedule. Students who have received federal loans at PMI will be sent an email upon reducing course load below half time, withdrawal, or graduation that includes the link to the National Student Loan Data System (NSLDS) exit-counseling website at studentaid.gov.

Medical Administrative Assistant

Objective: To develop in students the personal traits and professional skills needed to perform as competent entry-level medical administrative assistant professionals. The program provides students with knowledge of medical terminology, office management, medical insurance and billing, electronic health records, accounting procedures, patient communication, legal and ethical considerations.

Graduates of this program receive a certificate.

Admissions Requirements: Refer to the Admissions information in the Prospective Students section of this catalog.

Medical Administrative Assistant • Course Descriptions

Semester I

MAA101 Foundations of Medical Administrative Assisting
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course introduces students to the healthcare industry and typical responsibilities of a medical administrative assistant. Through hands-on experience, students will gain a general knowledge of computers. Legal and ethical considerations relevant to the medical office setting with a particular focus on Health Insurance Portability and Accountability Act (HIPAA) and patient confidentiality requirements will be addressed.
Prerequisites: None

MAA141 Medical Office Computer Applications
Total Course Hours: 90 (30 Theory, 60 Lab, 0 Extern) Semester Credits: 4.0
This course emphasizes the development and application of computer-based skills required in the medical office setting. Students engage in workplace-related computer projects using medical management software. Lab activities offer students focused opportunities to explore and practice common word-processing, spreadsheet, and presentation software.
Prerequisites: None

MAA121 Anatomy, Physiology, and Medical Terminology
Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0
This course provides students with a basic knowledge of anatomy, physiology, and medical terminology. Medical terms are introduced within the context of structures and functions of the body systems and the senses. Content also addresses pathology, procedures, and medications involved in treatment. Students learn to apply proper terminology and spelling for major pathological conditions. This course identifies and explains the terms used for the integumentary, respiratory, nervous, reproductive, endocrine, urinary, digestive, lymphatic, hematic, immune, and musculoskeletal systems.
Prerequisites: None

MAA111 Medical Office Communication and Documentation
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course introduces students to the types of professional communication, record keeping, and documentation skills expected of medical office professionals. Emphasis is placed on accuracy, confidentiality, and concise written communication. Medical documentation practices such as the transcription of patient histories and chart notes will be addressed. Content also focuses on the importance of proficient business writing and technology skills typically required in a medical office environment.
Prerequisites: None

Semester II

MAA151 Introduction to Medical Office Management
Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0
This course introduces students to the daily operations of the medical office environment, including basic policies/procedures, appointment scheduling, telephone etiquette, patient reception and processing, office equipment, supply inventory, financial and medical records management. Students review basic mathematical skills to provide them with a solid foundation for higher math concepts. Activities offer students opportunities to explore and practice routine tasks associated with entry-level medical office management.
Prerequisites: Foundations of Medical Administrative Assisting

MAA171 Electronic Health Record Management
Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0
This course introduces students to electronic health records (EHR), building upon previously learned foundational skills in medical administrative tasks, documentation, and technology applications. Basic EHR systems and the legal and regulatory issues related to their use are addressed. Through instruction, students learn about processing, assembling, and analyzing electronic health records.
Prerequisites: Foundations of Medical Administrative Assisting

MAA161 Medical Office Insurance, Billing, and Coding
Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0
This course addresses the fundamentals of insurance, billing, and coding procedures through practical training and activities. Course content includes terminology, documentation requirements, insurance plans, billing agencies, billing processes, patient payment issues, third-party reimbursement, and coding manuals. The proper guidelines for the ICD-10 diagnostic and CPT procedural coding systems, as well as electronic claim forms and the initiation of the claims process, will be addressed. The activities provide students with hands-on opportunities to apply what they have learned.
Prerequisites: Foundations of Medical Administrative Assisting

MAA181 Professional Capstone
Total Course Hours: 90 (30 Theory, 60 Lab, 0 Extern) Semester Credits: 4.0
The capstone course provides students with opportunities to synthesize learned skills and knowledge in real-world projects, including virtual externship, that prepare them for entry into the professional field. Students will acquire skills to seek and obtain employment in the field as well as develop strategies to highlight their professional attributes to employers and others.
Prerequisite: Successful completion of all semester 1 coursework

Pharmacy Technician

Objective: To develop in students the intrapersonal and professional skills needed to perform as competent entry-level pharmacy technicians through didactic instruction, hands-on laboratory practice, and externship experiences. Among the topics covered in the curriculum are customer service, drug inventory management, prescription preparation that includes training in sterile products and aseptic techniques, and other topics necessary to be effective members of the pharmacy technician team. A sterile products certification course is offered through the national Pharmacy Technician Association NPTA as part of the program.

Graduates of this program receive a certificate and are eligible to apply to take national examinations to become certified pharmacy technicians. The courses within the program are acceptable for credit toward PMI's Health Care Administration Associate of Applied Science Degree Program.

Admissions Requirements: Refer to the Admissions information in the Prospective Students section of this catalog. All Pharmacy Technician program applicants, prior to beginning classes, must complete and successfully pass a background check evidencing no felony or drug convictions.

Career Prep Sequence

CSK 100 Study Skills
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course provides students an opportunity to learn and adopt methods to promote success in school, work, and life. Topics include strategies to help students develop and improve their skills in time and stress management, reading comprehension and memorization, listening and note taking, and test preparation.
Prerequisites: None

CAT 150 Anatomy, Physiology, and Terminology
Total Course Hours: 55 (55 Theory, 0 Lab, 0 Extern) Semester Credits: 3.5
This course is designed to provide students with a basic knowledge of anatomy, physiology, and medical terminology. Medical terms are learned within the context of the structures and functions of the body systems (integumentary, musculoskeletal, nervous, endocrine, lymphatic, immune, cardiovascular, respiratory, digestive, urinary, reproductive) and the senses. Content also addresses pathology, procedures, and medications involved in treatment.
Prerequisites: None

CCB 100 Computer Basics
Total Course Hours: 15 (0 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5
Through demonstration and hands-on experience, students gain a general understanding of computers. In addition, hardware, software, Microsoft products, and internet use are explained.
Prerequisites: None

CMF 95 Math Fundamentals
Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
The course reviews basic mathematical skills including whole numbers, fractions, decimals, proportions, ratios, percentages, combined applications, and measurement systems. It provides students with a solid foundation for higher math concepts.
Prerequisites: None

CHS 100 CPR and First Aid
Total Course Hours: 15 (10 Theory, 5 Lab, 0 Extern) Semester Credits: 0.5
This course follows recognized standards that are designed to prepare students to provide basic first aid assistance and cardiopulmonary resuscitation (CPR) for adults, children, and infants. Students learn how to perform as an effective team member during multi-rescuer CPR situations and how to demonstrate the proper use of an automated external defibrillator (AED).
Prerequisites: None

Professional Sequence I

PHA 121 Pharmacy Math
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course emphasizes mathematical concepts for pharmaceutical and business-math calculations. Students apply their knowledge to learn and practice the types of calculations required of pharmacy technicians in the pharmacy setting.
Prerequisites: None

PHA 105 Inventory Maintenance
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course emphasizes procedures and systems for inventory management of medications, equipment, supplies, and devices in the pharmacy setting. Students learn standard procedures and documentation requirements for purchasing, receiving, and monitoring inventory along with proper identification, storage, and disposal of medications.
Prerequisites: None

PHA 165 Pharmacology
Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course examines the anatomy, physiology, pathology, and pharmacology of the muscular, skeletal, and nervous systems. Content addresses the therapeutic effects of prescription and nonprescription medications as well as alternative therapies associated with these systems. Topics include drug interactions, dosages, indications, contraindications, and routes of administration.
Prerequisites: None

PHA 180 Pharmacy Law and Ethics
Total Course Hours: 22 (22 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course provides an overview of legal requirements and ethical considerations pertinent to pharmacy technicians. Topics include federal and state statutes that regulate the pharmacy industry, agencies responsible for regulatory enforcement, and codes of ethics for pharmacy professionals.
Prerequisites: None

Pharmacy Technician • Course Descriptions

PHA 150 Sequence I Pharmacy Applications
Total Course Hours: 48 (0 Theory, 48 Lab, 0 Extern) Semester Credits: 1.5
This lab-based course provides students with hands-on opportunities to apply what they have learned in their lecture courses. Students are assessed on their knowledge of inventory control and recordkeeping with a focus on medications specific to the muscular, skeletal, and nervous systems.
Prerequisites: None

Professional Sequence II
PHA 131 Pharmacy Math
Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course emphasizes mathematical concepts for pharmaceutical calculations used in reconstitutions, dilutions, and concentrations. Students apply their knowledge to learn and practice the types of calculations required of pharmacy technicians in the pharmacy setting.
Prerequisites: None

PHA 170 Pharmacy Technician Duties
Total Course Hours: 27 (27 Theory, 0 Lab, 0 Extern) Semester Credits: 1.5
This course introduces students to the tasks and responsibilities of pharmacy technicians as well as expectations for professionalism in the work environment. Topics include types of pharmacy practice settings, health care team interactions, time and stress management, prescription related matters, insurance claims, and recordkeeping practices.
Prerequisites: None

PHA 175 Pharmacology
Total Course Hours: 25 (25 Theory, 0 Lab, 0 Extern) Semester Credits: 1.5
This course examines the anatomy, physiology, pathology, and pharmacology of the gastrointestinal, respiratory, and cardiovascular systems. Content addresses the therapeutic effects of prescription and nonprescription medications as well as alternative therapies associated with these systems. Topics include drug interactions, dosages, indications, contraindications, and routes of administration as well as hematological agents used to treat blood disorders and diseases.
Prerequisites: None

PHA 190 Sequence II Pharmacy Applications
Total Course Hours: 48 (0 Theory, 48 Lab, 0 Extern) Semester Credits: 1.5
This lab-based course provides students with hands-on opportunities to apply what they have learned in their lecture courses. Students participate in various role-play scenarios designed to engage and enhance critical thinking and problem-solving skills relevant to pharmacy practice settings. In addition, students are assessed on their knowledge of medications specific to the gastrointestinal, respiratory, cardiovascular, and hematologic systems.
Prerequisites: None

Professional Sequence III
PHA 141 Pharmacy Math
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course reviews mathematical concepts for pharmaceutical and intravenous (IV) calculations. Students apply their knowledge to learn and practice the types of calculations required of pharmacy technicians in the pharmacy setting.
Prerequisites: None

PHA 245 Principles of Customer Service
Total Course Hours: 10 (10 Theory, 0 Lab, 0 Extern) Semester Credits: 0.5
This course introduces students to customer service skills expected of pharmacy technicians. Topics include how to convey a professional image in the workplace, effective communication modes and strategies for various customer and health care team interactions, listening and speaking techniques, and cultural competency awareness.
Prerequisites: None

PHA 185 Pharmacology
Total Course Hours: 25 (25 Theory, 0 Lab, 0 Extern) Semester Credits: 1.5
This course examines the anatomy, physiology, pathology, and pharmacology of the urinary, endocrine, lymphatic, and reproductive systems. Content addresses the therapeutic effects of prescription and nonprescription medications as well as alternative therapies associated with these systems. Topics include drug interactions, dosages, indications, contraindications, and routes of administration.
Prerequisites: None

PHA 235 Pharmacy Laboratory Skills
Total Course Hours: 22 (22 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course provides students with hands-on opportunities to develop and practice pharmacy technician skills in a simulated pharmacy environment. Topics range from sterile/nonsterile compounding procedures to preparing and dispensing various forms of medications according to industry standards. Special emphasis is placed on infection control, strategies to prevent medication errors, and quality assurance in the pharmacy setting.
Prerequisites: None

PHA 230 Sequence III Pharmacy Applications
Total Course Hours: 48 (0 Theory, 48 Lab, 0 Extern) Semester Credits: 1.5
This lab-based course provides students with hands-on opportunities to apply what they have learned in their lecture courses. Students participate in activities designed to develop and enhance effective customer service skills in a simulated pharmacy environment. They also practice sterile and non-sterile compounding skills and become familiar with the pharmacy-related equipment used in compounding. Students are also assessed on their knowledge and application of medications specific to the urinary, endocrine, lymphatic, and reproductive systems.
Prerequisites: None

Professional Sequence IV
PHA 151 Pharmacy Math
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course emphasizes mathematical concepts for pharmaceutical calculations involving body weight and mass. Students apply their knowledge to learn and practice the types of calculations required of pharmacy technicians in the pharmacy setting.
Prerequisites: None

PHA 155 Pharmacy Computer Applications
Total Course Hours: 22 (10 Theory, 12 Lab, 0 Extern) Semester Credits: 1.0
This course explores the role of technology and pharmacy software systems in the pharmacy environment. Topics include collection, entry, storage, retrieval, and transmission of customer/patient, physician, and drug-related data.
Prerequisites: None

PHA 195 Pharmacology
Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course examines the anatomy, physiology, pathology, and pharmacology of the integumentary system and the eyes, ears, nose, and throat. Content addresses the therapeutic effects of prescription and nonprescription medications, including antineoplastic and oncology agents, anti-infective medications, and alternative therapies associated with these body structures. Topics include drug interactions, dosages, indications, contraindications, and routes of administration.
Prerequisites: None

PHA 265 Patient Safety
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course examines the role of the pharmacy technician in ensuring patient safety. Topics include strategies to prevent medication errors and ensure quality assurance in the pharmacy setting. Content also addresses prescription drug abuse and its impact on the public.
Prerequisites: None

PHA 270 Sequence IV Pharmacy Applications
Total Course Hours: 48 (0 Theory, 48 Lab, 0 Extern) Semester Credits: 1.5
This lab-based course provides students with hands-on opportunities to apply what they have learned in their lecture courses. Students develop skills in navigating a pharmacy information/software system and are assessed on their knowledge of medications specific to the integumentary system, and the eyes, ears, nose, and throat, including antineoplastic and oncology agents and anti-infective medications.
Prerequisites: None

Professional Sequence IV
PHA 250 Externship
Total Course Hours: 240 (0 Theory, 0 Lab, 240 Extern) Semester Credits: 5.0
This course provides students with opportunities to apply professional skills learned in the classroom.
Prerequisites: Career Prep and Professional Sequences I, II, III, and IV.

Pharmacy Technician - Renton Campus

Objective: To develop in students the intrapersonal and professional skills needed to perform as competent entry-level pharmacy technicians through didactic instruction, hands-on laboratory practice, and externship experiences. Among the topics covered in the curriculum are customer service, drug inventory management, prescription preparation that includes training in sterile products and aseptic techniques, and other topics necessary to be effective members of the pharmacy technician team. A sterile products certification course is offered through the National Pharmacy Technician Association/ NPTA as part of the program.

Graduates of this program receive a certificate and are eligible to apply to take national examinations to become certified pharmacy technicians. The courses within the program are acceptable for credit toward PMI's Health Care Administration Associate of Applied Science Degree Program.

Admissions Requirements: Refer to the Admissions information in the Prospective Students section of this catalog. All Pharmacy Technician program applicants, prior to beginning classes, must complete and successfully pass a background check evidencing no felony or drug convictions.

This course reviews mathematical concepts for pharmaceutical and intravenous (IV) calculations. Students apply their knowledge to learn and practice the types of calculations required of pharmacy technicians in the pharmacy setting.
Prerequisites: None

PHA 245 Principles of Customer Service
Total Course Hours: 10 (10 Theory, 0 Lab, 0 Extern) Semester Credits: 0.5
This course introduces students to customer service abilities expected of pharmacy technicians. Topics include how to convey a professional image in the work place, communication modes and strategies for various customer and health care team interactions, listening and speaking techniques, and cultural competency awareness.
Prerequisites: None

PHA 185 Pharmacology
Total Course Hours: 25 (25 Theory, 0 Lab, 0 Extern) Semester Credits: 1.5
This course examines the anatomy, physiology, pathology, and pharmacology of the urinary, endocrine, lymphatic, and reproductive systems. Content addresses the therapeutic effects of prescription and nonprescription medications as well as alternative therapies associated with these systems. Topics include drug interactions, dosages, indications, contraindications, and routes of administration.
Prerequisites: None

PHA 235 Pharmacy Laboratory Skills
Total Course Hours: 22 (22 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course provides students with hands-on opportunities to develop and practice pharmacy technician skills in a simulated pharmacy environment. Topics range from sterile/nonsterile compounding procedures to preparing and dispensing various forms of medications according to industry standards. Special emphasis is placed on infection control, strategies to prevent medication errors, and quality assurance in the pharmacy setting.
Prerequisites: None

PHA 230 Sequence III Pharmacy Applications
Total Course Hours: 48 (0 Theory, 48 Lab, 0 Extern) Semester Credits: 1.5
This lab-based course provides students with hands-on opportunities to apply what they have learned in their lecture courses. Students participate in activities designed to develop and enhance effective customer service skills in a simulated pharmacy environment. They also practice sterile and non-sterile compounding skills and become familiar with the pharmacy-related equipment used in compounding. Students are also assessed on their knowledge and application of medications specific to the urinary, endocrine, lymphatic, and reproductive systems.
Prerequisites: None

Professional Sequence IV
PHA 151 Pharmacy Math
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course emphasizes mathematical concepts for pharmaceutical calculations involving body weight and mass. Students apply their knowledge to learn and practice the types of calculations required of pharmacy technicians in the pharmacy setting.
Prerequisites: None

PHA 155 Pharmacy Computer Applications
Total Course Hours: 22 (10 Theory, 12 Lab, 0 Extern) Semester Credits: 1.0
This course explores the role of technology and pharmacy software systems in the pharmacy environment. Topics include collection, entry, storage, retrieval, and transmission of customer/patient, physician, and drug-related data.
Prerequisites: None

PHA 195 Pharmacology
Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course examines the anatomy, physiology, pathology, and pharmacology of the integumentary system and the eyes, ears, nose, and throat. Content addresses the therapeutic effects of prescription and nonprescription medications, including antineoplastic and oncology agents, anti-infective medications, and alternative therapies associated with these body structures. Topics include drug interactions, dosages, indications, contraindications, and routes of administration.
Prerequisites: None

PHA 265 Patient Safety
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course examines the role of the pharmacy technician in ensuring patient safety. Topics include strategies to prevent medication errors and ensure quality assurance in the pharmacy setting. Content also addresses prescription drug abuse and its impact on the public.
Prerequisites: None

PHA 270 Sequence IV Pharmacy Applications
Total Course Hours: 48 (0 Theory, 48 Lab, 0 Extern) Semester Credits: 1.5
This lab-based course provides students with hands-on opportunities to apply what they have learned in their lecture courses. Students develop skills in navigating a pharmacy information/software system and are assessed on their knowledge of medications specific to the integumentary system, and the eyes, ears, nose, and throat.
Prerequisites: None

Externship Sequence
PHA 276 Pharmacy Technician Certification Review
Total Course Hours: 40 (40 Theory, 0 Lab, 0 Extern) Semester Credits: 2.5
This course is designed to prepare students for the Pharmacy Technician Certification
Exam (PTCE) or the National Healthcareer Association (NHA) Exam for the Certification of Pharmacy Technicians (ExCPT). Students will review material necessary to prepare them for entry level practice as a pharmacy technician.
Prerequisites: Professional Sequences I, II, III, and IV.

PHA 280 Externship
Total Course Hours: 160 (0 Theory, 0 Lab, 160 Extern) Semester Credits: 3.5
This course provides students with opportunities to apply professional skills learned in the classroom.
Prerequisites: Career Prep and Professional Sequences I, II, III, and IV. In the state of Washington, students must be registered pharmacy assistants to be eligible to participate in externship.

Practical Nursing

Objective: To develop in students the intrapersonal and professional skills needed to perform as competent entry-level practical nurses through didactic instruction, hands-on laboratory practice, and clinical experiences. Among the topics covered in the curriculum are anatomy and physiology, growth and development, pharmacology, nursing theory, skills for patient care across the lifespan, and other topics necessary for students to acquire the knowledge and skills they need to perform as eff ective members of the practical nursing team.

Graduates of this program are granted a certifi cate and are eligible to apply to take the National Council on Licensure Examination (NCLEX-PN®). Those who pass the NCLEX-PN® are qualifi ed for state licensure or registration as a practical nurse.

Admission Requirements: In addition to the Admissions requirements in the Prospective Students section of this catalog, applicants must achieve a minimum score on the Pre-Entrance HESI Exam-PN®. An interview with the program director and/or faculty and other criteria may be required. Refer to the program specifi c Prospective Student Handout for more information.

Sequence I

MTH 127 Med Math
Total Course Hours: 16 (16 Theory, 0 Lab, 0 Clinical) Semester Credits: 1.0
This course presents calculation, conversion, and computation of fractions, decimals, ratios, proportions, percents, measurements, abbreviations, and data analysis. It also acquaints the student with the skills important for the health professional's application and critical thinking necessary for safe dosage calculations.
Prerequisites: None

CMT 102 Medical Terminology
Total Course Hours: 16 (16 Theory, 0 Lab, 0 Clinical) Semester Credits: 1.0
The course focuses on the development of a basic framework for the language of medicine. Through memorization and practice in spelling and pronunciation of medical roots, suffixes, and prefixes, students learn to create, analyze, and apply medical terms.
Prerequisites: None

HUN 100 Nutrition
Total Course Hours: 16 (16 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course acquaints students entering health professions with each of the major nutrients, nutritional requirements, methods used for planning nutritionally adequate and healthy diets, and nutrition needs throughout the life span. Current nutrition issues/controversies will be discussed.
Prerequisites: None

ENG 115 Communication and Composition
Total Course Hours: 32 (32 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course addresses the skills needed for effective oral and written communications in a variety of contexts. Among the topics addressed are verbal and nonverbal communication cues, active listening techniques, technical and professional writing, health literacy, cultural diversity, and professional courtesy.
Prerequisites: None

BIO 112 Anatomy and Physiology I
Total Course Hours: 40 (24 Theory, 16 Lab, 0 Clinical) Semester Credits: 2.0
This course provides students with the knowledge of the structure and function of the human body. Course content includes the organization of the human body including an introduction to each of the body systems, beginning with cellular structure. Other topics include the integumentary and musculoskeletal systems, disease and disease-producing organisms, and infectious diseases.
Prerequisites: Sequence I

NUR 104 Strategies for PN Success
Total Course Hours: 16 (16 Theory, 0 Lab, 0 Clinical) Semester Credits: 1.0
This course provides an opportunity to learn and adopt methods to promote success in school, work, and life. Topics include time management, reading skills, test-taking techniques, goal setting, and stress management.
Prerequisites: None

Sequence II

BIO 113 Anatomy and Physiology II
Total Course Hours: 40 (24 Theory, 16 Lab, 0 Clinical) Semester Credits: 2.0
This course provides students with the knowledge of the structure and function of the human body. Content focuses on the nervous, sensory, digestive, and urinary systems as well as fluids and electrolytes. Other course topics include benign and malignant cancers.
Prerequisites: Sequence I

NUR 105 Introduction to Nursing and Pharmacology
Total Course Hours: 88 (48 Theory, 40 Lab, 0 Clinical) Semester Credits: 4.0
This course introduces the role of the practical nurse and basic nursing. The historical perspective and elements of nursing as outlined by various nursing theories provide a framework for developing critical thinking in approaching health care. Additional topics include ethical/legal responsibilities, the PN scope of practice, state specific nurse practice acts, the nursing process, patient education, and basic needs. The course also provides the foundational knowledge and principles of pharmacology.
Prerequisites: Sequence I

Sequence III

BIO 116 Anatomy and Physiology III
Total Course Hours: 40 (24 Theory, 16 Lab, 0 Clinical) Semester Credits: 2.0
This course provides students with the knowledge of the structure and function of the human body. Content focuses on blood and the cardiovascular, respiratory, and endocrine systems.
Prerequisites: Sequences I and II

NUR 150 Elder Care and Nursing Theory
Total Course Hours: 80 (64 Theory, 16 Lab, 0 Clinical) Semester Credits: 4.5
This course addresses the nursing theory, pharmacology concepts, and the skills required to collect data and contribute to a basic physical assessment. Students will focus on caring for the aging population while providing culturally sensitive care and promoting independence. This course will also discuss the physical and cognitive changes that occur in the elderly. Students have opportunities to practice and demonstrate competency in simulated, interactive, and virtual settings.
Prerequisites: Sequence II; Concurrent enrollment in NUR 151 Clinical Foundations of Nursing I

NUR 151 Clinical Foundations of Nursing I
Total Course Hours: 95 (0 Theory, 0 Lab, 95 Clinical) Semester Credits: 2.0
This course provides the student with opportunities to apply concepts covered in the *Elder Care and Nursing Theory* course. Application includes clinical practice and competency/performance testing in simulated, interactive, and virtual settings.
Prerequisites: Sequence II; Concurrent enrollment in NUR 150 Elder Care and Nursing Theory

Sequence IV
BIO 117 Anatomy and Physiology IV
Total Course Hours: 40 (24 Theory, 16 Lab, 0 Clinical) Semester Credits: 2.0
This course provides students with knowledge of the structure and function of the human body. Content includes the male and female reproductive systems, development and birth, and heredity and hereditary diseases. Additional emphasis is placed on the lymphatic system and immunity.
Prerequisites: Sequences I, II, and III

NUR 160 Adult Medical and Surgical Community Health Nursing Theory
Total Course Hours: 64 (48 Theory, 16 Lab, 0 Clinical) Semester Credits: 3.5
This course addresses the nursing theory, pharmacology concepts, and skills required to collect data and contribute to a basic physical assessment of adults with various medical/surgical conditions. Emphasis is placed on cardiovascular, hematopoietic, respiratory, and endocrine systems. Concepts of community-based nursing services are explored. Students will have opportunities to practice and demonstrate competency in simulated, interactive, and virtual settings.
Prerequisites: Sequences II and III; Concurrent enrollment in NUR 161 Clinical Foundations of Nursing II

NUR 161 Clinical Foundations of Nursing II
Total Course Hours: 95 (0 Theory, 0 Lab, 95 Clinical) Semester Credits: 2.0
This course provides students with opportunities to apply concepts covered in the *Adult Medical and Surgical Community Health Nursing Theory* course. Clinical hours take place in various settings, including clinics, physician offices, community health care settings, and medical/surgical care agencies. Application includes clinical practice and competency/performance testing in simulated, interactive, and virtual settings.
Prerequisites: Sequences II and III; Concurrent enrollment in NUR 160 Adult Medical and Surgical Community Health Nursing Theory

Sequence V
PSY 120 Human Development Across the Life Span
Total Course Hours: 32 (32 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course addresses physical, cognitive, social, emotional, and psychosexual components of human growth and development from birth to death. Topics include analysis of activities that are directed toward developing, sustaining, and enhancing wellness during all stages of development in the journey toward psychosocial maturity. Students will explore the history and theories of growth and development, including the impact of ethnic, gender, and cultural factors on the process. The course provides opportunities for students to develop an understanding of shared decision-making among family, provider, and community.
Prerequisites: None

NUR 170 Maternal Child Nursing Theory
Total Course Hours: 64 (48 Theory, 16 Lab, 0 Clinical) Semester Credits: 3.5
This course provides knowledge of nursing theory, pharmacology concepts, and the skills required to collect data and contribute to a basic physical assessment, all of which will be applied during the study of the pregnancy and the birth process. Focus is on the pediatric population from birth to adulthood. Discussion will also include the immune, lymphatic, and reproductive systems. Students have opportunities to practice and demonstrate competency in simulated, interactive, and virtual settings.
Prerequisites: Sequences II, III, and IV; Concurrent enrollment in NUR 171 Clinical Foundations of Nursing III

NUR 171 Clinical Foundations of Nursing III
Total Course Hours: 95 (0 Theory, 0 Lab, 95 Clinical) Semester Credits: 2.0
This course provides students with opportunities to apply concepts from all current and prior nursing courses in a variety of clinical settings. Clinical hours are provided in pediatric, obstetric, community health, and adult medical/surgical facilities. Application includes clinical practice and competency/performance testing in simulated, interactive, and virtual settings.
Prerequisites: Sequences II, III, and IV; Concurrent enrollment in NUR 170 Maternal Child Nursing Theory

Sequence VI
NUR 180 Pharmacology - Intravenous Therapy
Total Course Hours: 40 (24 Theory, 16 Lab, 0 Clinical) Semester Credits: 2.0
This course focuses on intravenous (IV) therapy, including the fundamentals of fluid administration, premixed IV fluids containing electrolytes and vitamins, and premixed antibiotic solutions. Students develop and apply their knowledge of pharmacology concepts in the skills lab.
Prerequisites: Sequences I, II, III, IV, and V

NUR 200 Role Transition
Total Course Hours: 32 (32 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course is designed to prepare the student for the *National Council Licensure Examination for Practical/Vocational Nurses (NCLEX-PN®)* and professional practice by providing a comprehensive review of technical coursework, mock examinations, and appropriate test-taking strategies.
Prerequisites: Sequences I, II, III, IV, and V

NUR 205 Clinical Foundations of Nursing IV
Total Course Hours: 120 (0 Theory, 0 Lab, 120 Clinical) Semester Credits: 2.5
This course provides students with opportunities to apply learned theories and skills in a variety of clinical settings under the supervision of a qualified nursing faculty member. Students are given the opportunity to develop and implement a leadership project in collaboration with the clinical agency.
Prerequisites: Sequences I, II, III, IV, and V

Dental Hygiene - Houston Campus

Objective: The Dental Hygiene program prepares students to become competent entry-level dental hygienists through a combination of didactic instruction, hands-on laboratory practice, and clinical experiences. The curriculum develops intrapersonal and professional skills essential for delivering comprehensive oral healthcare and promoting oral and systemic health in diverse populations. Students acquire knowledge and skills in areas such as anatomy and physiology, periodontology, dental practice management, dental hygiene law and ethics, general and oral pathology, patient management, pharmacology, public health dentistry, and radiology. Emphasizing critical thinking, evidence-based practices, and professional values, the program prepares graduates to function as effective members of a professional dental care team, advocate for patient-centered care, and engage in lifelong learning.

Graduates earn an Associate of Applied Science Degree and are eligible to apply for the National Board Dental Hygiene Examination (NBDHE) and other board examinations required for state licensure.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, a portfolio and an interview with the program director and/or faculty is required. Refer to the program specific Prospective Student Handout for more information.

Dental Hygiene—Houston Campus • Course Descriptions

Semester I

CCM 165 Communications and Composition
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course addresses the skills needed for effective oral and written communications in a variety of contexts. Among the topics addressed are verbal and nonverbal communication cues, active listening techniques, technical and professional writing, evaluating culturally diverse points of view, and professional courtesy.
Prerequisites: None

BIO 110 Anatomy and Physiology
Total Course Hours: 60 (60 Theory, 0 Lab, 0 Clinical) Semester Credits: 4.0
This course provides an introduction to the structures and functions of systems within the human body, including integumentary, musculoskeletal, endocrine, nervous, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive. Course content addresses the roles of cellular, tissue, and organ structures within each system and within the human body as a whole.
Prerequisites: None

BIO 145 Microbiology and Immunology
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course explores the fundamental principles of microbiology, immunology, and infectious disease transmission. Discussion topics include the characteristics of bacteria, fungi, and viruses and their roles in infectious disease transmission, various laboratory processes, microbial growth, and immunity, among others.
Prerequisites: None

RDH 101 Introduction to Dental Hygiene
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course introduces the role of a dental hygienist, beginning with the fundamental theoretical concepts of professionalism, law and ethics, oral health and disease, and the dental hygiene process of care.
Prerequisites: None

RDH 186 Dental Anatomy
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course provides a foundational understanding of the development and anatomy of human teeth. Course content includes embryonic development, craniofacial development, tooth development and eruption sequences, histologic features of tooth structures, anatomy of the periodontium and salivary structures, and specific morphology of each tooth.
Prerequisites: None

Semester II

CHM 125 Chemistry/Biochemistry
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course introduces the basic concepts of general chemistry as well as organic and inorganic chemistry and biochemistry. Topics include elements and compounds, chemical equations, nomenclature, molecular structure, and the chemistry of proteins, carbohydrates, lipids, and other biological compounds.
Prerequisites: Semester I courses

RDH 106 Head and Neck Anatomy
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course explores the anatomical features and functions of the head and neck region within the context of dental hygiene clinical practice. Students acquire in-depth understanding of the head and neck region through examination and identification of associated osteological, muscular, vascular, nervous, and lymphatic structures.
Prerequisites: Semester I courses

RDH 118 Medical Emergencies
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Clinical) Semester Credits: 1.0
This course is designed to instill a working knowledge of appropriate assessment procedures required to obtain and evaluate patient histories that may indicate patients at risk for medical emergencies in the dental setting. Students analyze case scenarios and apply critical thinking skills to accurately identify, treat, manage, and prevent various emergency situations.
Prerequisites: Semester I courses

RDH 117 Preclinical Dental Hygiene
Total Course Hours: 135 (45 Theory, 0 Lab, 90 Clinical) Semester Credits: 3.0
This course begins development of the professional competencies and clinical skills that continue throughout the dental hygiene theoretical and clinical curriculum. Among the topics included are clinical policy/procedure, maintaining a safe and aseptic work environment, patient assessment techniques, and duties related to basic instrumentation and equipment.
Prerequisites: Semester I courses

RDH 211 Radiology
Total Course Hours: 75 (30 Theory, 45 Lab, 0 Clinical) Semester Credits: 3.5
This course provides the student with the scientific principles and clinical applications relating to the performance of dental radiographic procedures. Content emphasizes techniques of exposing, processing, mounting, and critically interpreting intraoral and panoramic radiographs, and provides students with radiation and infection control principles for use in practical applications. Laboratory experience allows students to gain initial radiographic skills that are utilized throughout the clinical courses.
Prerequisites: Semester I courses

Semester III
RDH 151 Dental Hygiene I
Total Course Hours: 30 (30 Theory, 30 Lab, 0 Clinical) Semester Credits: 3.0
This course is a continuation of the theoretical development of dental hygiene skills as well as the introduction of advanced clinical topics. Content includes patient communication strategies, recare and periodontal maintenance protocol, the referral process, air-powder polishers, advanced dental hygiene instruments, and use of ultrasonic-powered instrumentation devices.
Prerequisites: Semesters I and II courses

RDH 156 Clinical Dental Hygiene I
Total Course Hours: 116 (0 Theory, 0 Lab, 116 Clinical) Semester Credits: 2.5
This course applies previously learned skills in a clinical setting under direct professional supervision. Content emphasizes patient care through the application of assessment techniques, treatment planning, calculus detection, and basic instrumentation and procedures. Students are evaluated with the expectation of demonstrating beginning competency level in direct patient care.
Prerequisites: Semesters I and II courses

RDH 219 Biomaterials
Total Course Hours: 60 (30 Theory, 30 Lab, 0 Clinical) Semester Credits: 3.0
This course provides an overview of materials used in dentistry, dental hygiene, and dental laboratory procedures. Topics include chemical and physical properties of dental materials, with an emphasis on the handling, manipulation, and rationale for use of materials used in dental hygiene and dentistry. Lab time provides students opportunities to apply their knowledge of various biomaterials.
Prerequisites: Semesters I and II courses

RDH 218 Periodontics
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course examines the effects of periodontal disease on overall health. Through exploration of the epidemiology, etiology, microbiology, and immunology of various periodontal diseases, students develop skills that enable them to differentiate healthy and diseased periodontium. Further, they will learn to evaluate the extent and severity of the periodontal diseases and develop appropriate clinical treatment recommendations.
Prerequisites: Semesters I and II courses

RDH 260 Pharmacology for Dental Hygiene
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course covers the basic components of pharmacology with emphasis on the interaction with the biologic systems in the body as well as those that specifically affect oral health. Topics include therapeutic use, pharmacokinetics, pharmacodynamics, pharmacologic effects, adverse effects, drug interactions, and contraindications, among others.
Prerequisites: Semesters I and II courses

Semester IV
PSY 125 Psychology
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course introduces basic concepts in human psychology through an overview of the foundations of the discipline and a more in-depth look at contemporary approaches in the field. Among the many topics included are mental health, well-being, behavior, cognition, personality traits, life-span development, social interactions, and various therapies used to treat psychological disorders.
Prerequisites: Semesters I, II, and III courses

RDH 176 Dental Hygiene II
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course integrates the cognitive, psychomotor, and affective foundations of dental hygiene practice through exposure to increasingly complex patient cases, individualized risk assessment and dental hygiene care planning, dental management of various special needs and/or medically compromised patients, effective communication techniques, and case management skills. Topics also include evidence-based treatment for nonsurgical periodontal therapy, evaluation of treatment outcomes, and professional development strategies.
Prerequisites: Semesters I, II, and III courses

RDH 181 Clinical Dental Hygiene II
Total Course Hours: 116 (0 Theory, 0 Lab, 116 Clinical) Semester Credits: 2.5
This course integrates the cognitive, psychomotor, and affective foundations of dental hygiene practice through exposure to increasingly complex patient cases, with emphasis on the development of advanced instrumentation, individualized risk assessment, and case management skills. Topics include evidence-based treatment for nonsurgical periodontal therapy, evaluation of treatment outcomes, and professional development strategies. Students execute a periodontal case study utilizing a review of evidence-based professional literature to expand critical thought processes.
Prerequisites: Semesters I, II, and III courses

RDH 214 Patient/Pain Management
Total Course Hours: 75 (30 Theory, 45 Lab, 0 Clinical) Semester Credits: 3.5
This course conveys a working knowledge of theoretical and practical applications of various physical, chemical, and psychological modalities intended for pain and anxiety management. Topics address the safe, ethical, legal, and proficient administration of local anesthesia and nitrous oxide in the clinical setting.
Prerequisites: Semesters I, II, and III courses

RDH 220 General/Oral Pathology
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course introduces general pathology concepts relevant to systemic and oral conditions. Discussion topics address recognition, description, and assessment of characteristics that deviate from normal findings. Students apply critical thinking skills to evaluate case studies that include laboratory, clinical, and radiographic data designed to elicit differential diagnoses of oral lesions.
Prerequisites: Semesters I, II, and III courses

Semester V
SOC 110 Sociology
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course examines the sociological perspective of human behavior. Content addresses the structure and function of human societies and the interaction of people within societies. Topics include cultural belief systems, economic and political influences, and social classes, among others.
Prerequisites: Semesters I, II, III, and IV courses

RDH 201 Dental Hygiene III
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course applies concepts and principles introduced in earlier dental hygiene courses and further explores the dental management of various special needs and/or medically compromised patients. Emphasis is on increasingly complex cases that are designed to develop critical thinking skills and that emphasize appropriate assessment and planning techniques for a variety of special needs populations and practice-related situations.
Prerequisites: Semesters I, II, III, and IV courses

RDH 206 Clinical Dental Hygiene III
Total Course Hours: 172 (0 Theory, 0 Lab, 172 Clinical) Semester Credits: 3.5
This course applies increasingly complex knowledge and skills acquired in earlier semesters in patient assessment, management, treatment, evaluation, and preventive measures as part of comprehensive patient care. Students are evaluated with the expectation of demonstrating increased proficiency in direct patient care.
Prerequisites: Semesters I, II, III, and IV courses

RDH 209 Nutrition and Cariology
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course covers foundational biochemistry of nutrition, specific nutritional requirements throughout the life stages, special requirements for systemic diseases, and how nutrition relates to oral health and disease. These nutritional concepts are then applied to the field of cariology as it relates to the development, function, and progression or reversal of caries. Advanced topics relative to dental caries include pathophysiology, diagnosis, risk assessment, development of appropriate prevention and therapeutic strategies, and trends in caries research.
Prerequisites: Semesters I, II, III, and IV courses

RDH 252 Community and Public Dental Health I
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course introduces public health concepts and practices relevant to the field of dental hygiene. Content includes epidemiology, disease prevention, and advocacy for community access to dental care. Students apply critical thinking skills to explore various research-related topics that incorporate biostatistics, study methods, and other considerations to advance knowledge and literature review competence. Emphasis is on community outreach into underserved area/populations.
Prerequisites: Semesters I, II, III, and IV courses

Dental Hygiene—Houston Campus • Course Descriptions

Semester VI

RDH 253 Community and Public Dental Health II

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course reinforces public health concepts and practices relevant to the field of dental hygiene. Content focuses on preparing students to evaluate, assess, and then identify appropriate treatment methodologies for patients with medical, physical, and other special considerations. Students apply critical thinking skills to explore various research-related topics that incorporate biostatistics, study methods, and other considerations to advance knowledge and literature review competence. Emphasis is placed on community outreach into underserved areas/populations.

Prerequisites: Semesters I, II, III, IV, and V courses

RDH 241 Dental Hygiene IV

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course applies the concepts and principles introduced in earlier dental hygiene courses and further explores the dental management of various special needs and/or medically compromised patients. Emphasis is on the dental management for special needs populations including pertinent legislation and access to care issues, student preparation for the clinical board exam, and preparing the student for progression into the dental practice.

Prerequisites: Semesters I, II, III, IV, and V courses

RDH 246 Clinical Dental Hygiene IV

Total Course Hours: 172 (0 Theory, 0 Lab, 172 Clinical) Semester Credits: 3.5

This course assesses clinical competency in preparation for professional employment in which students assess, plan, treat, and evaluate outcomes for patients with diverse medical, dental, and social histories. Students may participate in clinics designed to simulate private practice. Students are evaluated with the expectation of demonstrating advanced proficiency in direct patient care.

Prerequisites: Semesters I, II, III, IV, and V courses

RDH 226 Review of Dental Hygiene

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0

This course provides a comprehensive review of the theory, concepts, and techniques taught in the preceding semesters to prepare students for the National Board Dental Hygiene Examination. Students participate in study groups to identify study topics, discuss case studies, and review practice questions.

Prerequisites: Semesters I, II, III, IV, and V courses

RDH 291 Principles of Dental Hygiene Practice

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course reinforces knowledge of prior content with a focus on career readiness. Students prepare for their transition from an academic setting to the dental practice environment through various activities designed to enhance opportunities for employment. Discussion topics include practice management, legal and ethical principles, and professional responsibilities and expectations.

Prerequisites: Semesters I, II, III, IV, and V courses

Dental Hygiene - Seattle Campus

Objective: The Dental Hygiene program prepares students to become competent entry-level dental hygienists through a combination of didactic instruction, hands-on laboratory practice, and clinical experiences. The curriculum develops intrapersonal and professional skills essential for delivering comprehensive oral healthcare and promoting oral and systemic health in diverse populations. Students acquire knowledge and skills in areas such as anatomy and physiology, periodontology, dental practice management, dental hygiene law and ethics, general and oral pathology, patient management, pharmacology, public health dentistry, and radiology. Emphasizing critical thinking, evidence-based practices, and professional values, the program prepares graduates to function as effective members of a professional dental care team, advocate for patient-centered care, and engage in lifelong learning.

Graduates earn an Associate of Applied Science Degree and are eligible to apply for the National Board Dental Hygiene Examination (NBDHE) and other board examinations required for state licensure.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, a portfolio and an interview with the program director and/or faculty is required. Refer to the program specific Prospective Student Handout for more information.

Dental Hygiene—Seattle Campus • Course Descriptions

Semester I

CCM 145 Communications and Composition
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course addresses the skills needed for effective oral and written communications in a variety of contexts. Among the topics addressed are verbal and nonverbal communication cues, active listening techniques, technical and professional writing, evaluating culturally diverse points of view, and professional courtesy.
Prerequisites: None

PSY 125 Psychology
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course introduces basic concepts in human psychology through an overview of the foundations of the discipline and a more in-depth look at contemporary approaches in the field. Among the many topics included are mental health, well-being, behavior, cognition, personality traits, life-span development, social interactions, and various therapies used to treat psychological disorders.
Prerequisites: None

BIO 115 Anatomy and Physiology
Total Course Hours: 75 (45 Theory, 30 Lab, 0 Clinical) Semester Credits: 4.0
This course provides an introduction to the structures and functions of systems within the human body, including integumentary, musculoskeletal, endocrine, nervous, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive. Course content addresses the roles of cellular, tissue, and organ structures within each system and within the human body as a whole.
Prerequisites: None

BIO 145 Microbiology and Immunology
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course explores the fundamental principles of microbiology, immunology, and infectious disease transmission. Discussion topics include the characteristics of bacteria, fungi, and viruses and their roles in infectious disease transmission, various laboratory processes, microbial growth, and immunity, among others.
Prerequisites: None

RDH 101 Introduction to Dental Hygiene
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course introduces the role of a dental hygienist, beginning with the fundamental theoretical concepts of professionalism, law and ethics, oral health and disease, and the dental hygiene process of care.
Prerequisites: None

RDH 186 Dental Anatomy
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course provides a foundational understanding of the development and anatomy of human teeth. Course content includes embryonic development, craniofacial development, tooth development and eruption sequences, histologic features of tooth structures, anatomy of the periodontium and salivary structures, and specific morphology of each tooth.
Prerequisites: None

Semester II

SOC 110 Sociology
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course examines the sociological perspective of human behavior. Content addresses the structure and function of human societies and the interaction of people within societies. Topics include cultural belief systems, economic and political influences, and social classes, among others.
Prerequisites: Semester I courses

CHM 125 Chemistry/Biochemistry
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course introduces the basic concepts of general chemistry as well as organic and inorganic chemistry and biochemistry. Topics include elements and compounds, chemical equations, nomenclature, molecular structure, and the chemistry of proteins, carbohydrates, lipids, and other biological compounds.
Prerequisites: Semester I courses

BIO 136 Head and Neck Anatomy
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course explores the anatomical features and functions of the head and neck region within the context of dental hygiene clinical practice. Students acquire in-depth understanding of the head and neck region through examination and identification of associated osteological, muscular, vascular, nervous, and lymphatic structures.
Prerequisites: Semester I courses

RDH 118 Medical Emergencies
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Clinical) Semester Credits: 1.0
This course is designed to instill a working knowledge of appropriate assessment procedures required to obtain and evaluate patient histories that may indicate patients at risk for medical emergencies in the dental setting. Students analyze case scenarios and apply critical thinking skills to accurately identify, treat, manage, and prevent various emergency situations.
Prerequisites: Semester I courses

RDH 116 Preclinical Dental Hygiene
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course begins development of the professional competencies that continue throughout the dental hygiene theoretical and clinical curriculum. Among the topics included are clinical policy/procedure, maintaining a safe and aseptic work environment, patient assessment techniques, and duties related to basic instrumentation and equipment.
Prerequisites: Semester I courses

RDH 120 Preclinical Clinical Dental Hygiene
Total Course Hours: 90 (0 Theory, 0 Lab, 90 Clinical) Semester Credits: 2.0
This course begins development of the clinical skills that continue throughout the dental hygiene sequence of classes. Clinical concepts introduced and practiced include clinical policy/procedure, maintaining a safe and aseptic work environment, patient assessment techniques, and duties related to basic instrumentation and equipment.
Prerequisites: Semester I courses

RDH 211 Radiology
Total Course Hours: 75 (30 Theory, 45 Lab, 0 Clinical) Semester Credits: 3.5
This course provides the student with the scientific principles and clinical applications relating to the performance of dental radiographic procedures. Content emphasizes techniques of exposing, processing, mounting, and critically interpreting intraoral and panoramic radiographs, and provides students with radiation and infection control principles for use in practical applications. Laboratory experience allows students to gain initial radiographic skills that are utilized throughout the clinical courses.
Prerequisites: Semester I courses

Semester III
RDH 150 Dental Hygiene I
Total Course Hours: 30 (30 Theory, 15 Lab, 0 Clinical) Semester Credits: 2.5
This course is a continuation of the theoretical development of dental hygiene skills as well as the introduction of advanced clinical topics. Content includes patient communication strategies, recare and periodontal maintenance protocol, the referral process, air-powder polishers, and use of ultrasonic-powered instrumentation devices.
Prerequisites: Semesters I and II courses

RDH 155 Clinical Dental Hygiene I
Total Course Hours: 120 (0 Theory, 0 Lab, 120 Clinical) Semester Credits: 2.5
This course applies previously learned skills in a clinical setting under direct professional supervision. Content emphasizes patient care through the application of assessment techniques, treatment planning, calculus detection, and basic instrumentation and procedures. Students are evaluated with the expectation of demonstrating beginning competency level in direct patient care.
Prerequisites: Semesters I and II courses

RDH 215 Biomaterials
Total Course Hours: 60 (15 Theory, 45 Lab, 0 Clinical) Semester Credits: 2.5
This course provides an overview of materials used in dentistry, dental hygiene, and dental laboratory procedures. Topics include chemical and physical properties of dental materials, with an emphasis on the handling, manipulation, and rationale for use of materials used in dental hygiene and dentistry. Lab time provides students opportunities to apply their knowledge of various biomaterials.
Prerequisites: Semesters I and II courses

RDH 218 Periodontics
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course examines the effects of periodontal disease on overall health. Through exploration of the epidemiology, etiology, microbiology, and immunology of various periodontal diseases, students develop skills that enable them to differentiate healthy and diseased periodontium. Further, they will learn to evaluate the extent and severity of the periodontal diseases and develop appropriate clinical treatment recommendations.
Prerequisites: Semesters I and II courses

RDH 260 Pharmacology for Dental Hygiene
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course covers the basic components of pharmacology with emphasis on the interaction with the biologic systems in the body as well as those that specifically affect oral health. Topics include therapeutic use, pharmacokinetics, pharmacodynamics, pharmacologic effects, adverse effects, drug interactions, and contraindications, among others.
Prerequisites: Semesters I and II courses

Semester IV
RDH 175 Dental Hygiene II
Total Course Hours: 30 (30 Theory, 15 Lab, 0 Clinical) Semester Credits: 2.5
This course integrates the cognitive, psychomotor, and affective foundations of dental hygiene practice through exposure to increasingly complex patient cases, development of advanced instrumentation skills, individualized risk assessment and dental hygiene care planning, dental management of various special needs and/or medically compromised patients, effective communication techniques, and case management skills. Topics also include evidence-based treatment for nonsurgical periodontal therapy, evaluation of treatment outcomes, and professional development strategies.
Prerequisites: Semesters I, II, and III courses

RDH 180 Clinical Dental Hygiene II
Total Course Hours: 150 (0 Theory, 0 Lab, 150 Clinical) Semester Credits: 3.0
This course integrates the cognitive, psychomotor, and affective foundations of dental hygiene practice through exposure to increasingly complex patient cases, with emphasis on the development of advanced instrumentation, individualized risk assessment, and case management skills. Topics include evidence-based treatment for nonsurgical periodontal therapy, evaluation of treatment outcomes, and professional development strategies. Students execute a periodontal case study utilizing a review of evidence-based professional literature to expand critical thought processes.
Prerequisites: Semesters I, II, and III courses

RDH 209 Nutrition and Cariology
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course covers foundational biochemistry of nutrition, specific nutritional requirements throughout the life stages, special requirements for systemic diseases, and how nutrition relates to oral health and disease. These nutritional concepts are then applied to the field of cariology as it relates to the development, function, and progression or reversal of caries. Advanced topics relative to dental caries include pathophysiology, diagnosis, risk assessment, development of appropriate prevention and therapeutic strategies, and trends in caries research.
Prerequisites: Semesters I, II, and III courses

RDH 214 Patient/Pain Management
Total Course Hours: 75 (30 Theory, 45 Lab, 0 Clinical) Semester Credits: 3.5
This course conveys a working knowledge of theoretical and practical applications of various physical, chemical, and psychological modalities intended for pain and anxiety management. Topics address the safe, ethical, legal, and proficient administration of local anesthesia and nitrous oxide in the clinical setting.
Prerequisites: Semesters I, II, and III courses

RDH 220 General/Oral Pathology
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course introduces general pathology concepts relevant to systemic and oral conditions. Discussion topics address recognition, description, and assessment of characteristics that deviate from normal findings. Students apply critical thinking skills to evaluate case studies that include laboratory, clinical, and radiographic data designed to elicit differential diagnoses of oral lesions.
Prerequisites: Semesters I, II, and III courses

RDH 223 Restorative Lab I
Total Course Hours: 30 (0 Theory, 30 Lab, 0 Clinical) Semester Credits: 1.0
This course focuses on the development of restorative skills. Content emphasizes placement and carving of amalgam and composite restorations on a dentoform.
Prerequisites: Semesters I, II, and III courses

Semester V
RDH 200 Dental Hygiene III
Total Course Hours: 45 (30 Theory, 15 Lab, 0 Clinical) Semester Credits: 2.5
This course applies concepts and principles introduced in earlier dental hygiene courses. Students participate in increasingly complex problem-based learning activities that are designed to develop critical thinking skills and that emphasize appropriate assessment and planning techniques for a variety of practice-related situations. Discussion topics include preparation for clinical boards.
Prerequisites: Semesters I, II, III, and IV courses

RDH 205 Clinical Dental Hygiene III
Total Course Hours: 180 (0 Theory, 0 Lab, 180 Clinical) Semester Credits: 4.0
This course applies increasingly complex knowledge and skills acquired in earlier semesters in patient assessment, management, treatment, evaluation, and preventive measures as part of comprehensive patient care. Students are evaluated with the expectation of demonstrating increased proficiency in direct patient care.
Prerequisites: Semesters I, II, III, and IV courses

RDH 251 Treatment of Special Needs Patient Seminar
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course explores various assessment and treatment practices for special needs populations. Content and activities focus on preparing students to identify appropriate treatment approaches for patients with medical, physical, and other special considerations. Students participate in activities designed to enhance their knowledge and understanding of various treatment strategies that are appropriate for a range of special needs situations.
Prerequisites: Semesters I, II, III, and IV courses

RDH 259 Community and Public Dental Health
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course introduces public health concepts relevant to the field of dental hygiene. Content includes epidemiology, disease prevention, and advocacy for community access to dental care, among others. Students apply critical thinking skills to explore various research-related topics that incorporate biostatistics, study methods, and other considerations to advance knowledge and literature review competence. Student collaboration experiences culminate in designing a community health project that demonstrates understanding of needs assessment, planning, implementation, and outcome evaluations.
Prerequisites: Semesters I, II, III, and IV courses

RDH 233 Restorative Lab II
Total Course Hours: 90 (15 Theory, 75 Lab, 0 Clinical) Semester Credits: 3.5
This course focuses on continued development of restorative skills. Amalgam, composite, glass ionomer, and provisional restorative materials will be covered as well as materials utilized for cements, bases, and liners. Students develop competency in placing, finishing, polishing, and evaluating composite and amalgam restorations.
Prerequisites: Semesters I, II, III, and IV courses

Semester VI
RDH 230 Dental Health Promotions
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course applies the concepts of preventive dentistry, oral health education, and nutritional counseling to the development and implementation of oral health promotion programs. Communication and behavior modification skills are utilized to develop the student as a health educator. Students will be exposed to various preventive strategies that can be used to promote and maintain oral health. Emphasis is on community outreach into underserved areas/populations.
Prerequisites: Semesters I, II, III, IV, and V courses

RDH 240 Dental Hygiene IV
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Clinical) Semester Credits: 1.0
This course applies the concepts and principles introduced in earlier dental hygiene courses through problem-based learning activities with an emphasis on self-evaluation and lifelong learning. Topics include student preparation for the clinical board exams, clinical setting preparation, and licensing requirements.
Prerequisites: Semesters I, II, III, IV, and V courses

RDH 245 Clinical Dental Hygiene IV
Total Course Hours: 180 (0 Theory, 0 Lab, 180 Clinical) Semester Credits: 4.0
This course assesses clinical competency in preparation for professional employment in which students assess, plan, treat, and evaluate outcomes for patients with diverse medical, dental, and social histories. Students may participate in clinics designed to simulate private practice. Students are evaluated with the expectation of demonstrating advanced proficiency in direct patient care.
Prerequisites: Semesters I, II, III, IV, and V courses

RDH 226 Review of Dental Hygiene
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0
This course provides a comprehensive review of the theory, concepts, and techniques taught in the preceding semesters to prepare students for the National Board Dental Hygiene Examination. Students participate in study groups to identify study topics, discuss case studies, and review practice questions.
Prerequisites: Semesters I, II, III, IV, and V courses

RDH 291 Principles of Dental Hygiene Practice
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0
This course reinforces knowledge of prior content with a focus on career readiness. Students prepare for their transition from an academic setting to the dental practice environment through various activities designed to enhance opportunities for employment. Discussion topics include practice management, legal and ethical principles, and professional responsibilities and expectations.
Prerequisites: Semesters I, II, III, IV, and V courses

RDH 285 Restorative Clinic
Total Course Hours: 60 (0 Theory, 0 Lab, 60 Clinical) Semester Credits: 1.0
This course expands the knowledge and skills developed in prior courses. Implementation, evaluation, and documentation of restorative procedures are performed on patients during a supervised clinical setting.
Prerequisites: Semesters I, II, III, IV, and V courses

Dental Hygiene - San Antonio Campus

Objective: The Dental Hygiene program prepares students to become competent entry-level dental hygienists through a combination of didactic instruction, hands-on laboratory practice, and clinical experiences. The curriculum develops intrapersonal and professional skills essential for delivering comprehensive oral healthcare and promoting oral and systemic health in diverse populations. Students acquire knowledge and skills in areas such as anatomy and physiology, periodontology, dental practice management, dental hygiene law and ethics, general and oral pathology, patient management, pharmacology, public health dentistry, and radiology. Emphasizing critical thinking, evidence-based practices, and professional values, the program prepares graduates to function as effective members of a professional dental care team, advocate for patient-centered care, and engage in lifelong learning.

Graduates earn an Associate of Applied Science Degree and are eligible to apply for the National Board Dental Hygiene Examination (NBDHE) and other board examinations required for state licensure.)

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, a portfolio and an interview with the program director and/or faculty is required. Refer to the program specific Prospective Student Handout for more information.

Dental Hygiene - San Antonio Campus • Course Descriptions

Quarter I

COMM 1000 Communications & Composition
Total Course Hours: 30 (45 Theory, 0 Lab, 0 Clinical) Quarter Credits: 3.0
This course addresses the skills needed for effective oral and written communications in a variety of contexts. Among the topics addressed are verbal and nonverbal communication cues, active listening techniques, technical and professional writing, evaluating culturally diverse points of view, and professional courtesy.
Prerequisites: None

BIOL 1000 Anatomy & Physiology
Total Course Hours: 60 (60 Theory, 0 Lab, 0 Clinical) Quarter Credits: 6.0
This course provides an introduction to the structures and functions of systems within the human body, including integumentary, musculoskeletal, endocrine, nervous, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive. Course content addresses the roles of cellular, tissue, and organ structures within each system and within the human body as a whole.
Prerequisites: None

BIOL 1100 Microbiology & Immunology
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Quarter Credits: 4.5
This course explores the fundamental principles of microbiology, immunology, and infectious disease transmission. Discussion topics include the characteristics of bacteria, fungi, and viruses and their roles in infectious disease transmission, various laboratory processes, microbial growth, and immunity, among others.
Prerequisites: None

DHYG 1200 Introduction to Dental Hygiene
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Quarter Credits: 3.0
This course introduces the role of a dental hygienist, beginning with the fundamental theoretical concepts of professionalism, law and ethics, oral health and disease, and the dental hygiene process of care.
Prerequisites: None

DHYG 1000 Dental Anatomy
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Quarter Credits: 4.5
This course provides a foundational understanding of the development and anatomy of human teeth. Course content includes embryonic development, craniofacial development, tooth development and eruption sequences, histologic features of tooth structures, anatomy of the periodontium and salivary structures, and specific morphology of each tooth.
Prerequisites: None

Quarter II

CHEM 1000 Chemistry/Biochemistry
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Quarter Credits: 4.5
This course introduces the basic concepts of general chemistry as well as organic and inorganic chemistry and biochemistry. Topics include elements and compounds, chemical equations, nomenclature, molecular structure, and the chemistry of proteins, carbohydrates, lipids, and other biological compounds.
Prerequisites: Quarter I courses

DHYG 1010 Head & Neck Anatomy
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Quarter Credits: 3.0
This course explores the anatomical features and functions of the head and neck region within the context of dental hygiene clinical practice. Students acquire in-depth understanding of the head and neck region through examination and identification of associated osteological, muscular, vascular, nervous, and lymphatic structures.
Prerequisites: Quarter I courses

DHYG 1020 Medical Emergencies
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Clinical) Quarter Credits: 1.5
This course is designed to instill a working knowledge of appropriate assessment procedures required to obtain and evaluate patient histories that may indicate patients at risk for medical emergencies in the dental setting. Students analyze case scenarios and apply critical thinking skills to accurately identify, treat, manage, and prevent various emergency situations.
Prerequisites: Quarter I courses

DHYG 1210 Preclinical Dental Hygiene
Total Course Hours: 129 (45 Theory, 0 Lab, 84 Clinical) Quarter Credits: 7.0
This course begins development of the professional competencies that continue throughout the dental hygiene theoretical and clinical curriculum. Among the topics included are clinical policy/procedure, maintaining a safe and aseptic work environment, patient assessment techniques, and duties related to basic instrumentation and equipment.
Prerequisites: Quarter I courses

Dental Hygiene - San Antonio Campus • Course Descriptions

DHYG 1100 Radiology
Total Course Hours: 75 (30 Theory, 45 Lab, 0 Clinical) Quarter Credits: 5.0
This course provides the student with the scientific principles and clinical applications relating to the performance of dental radiographic procedures. Content emphasizes techniques of exposing, processing, mounting, and critically interpreting intraoral and panoramic radiographs, and provides students with radiation and infection control principles for use in practical applications. Laboratory experience allows students to gain initial radiographic skills that are utilized throughout the clinical courses.
Prerequisites: Quarter I courses

Quarter III
DHYG 1220 Dental Hygiene I
Total Course Hours: 66 (30 Theory, 36 Lab, 0 Clinical) Quarter Credits: 4.5
This course is a continuation of the theoretical development of dental hygiene skills as well as the introduction of advanced clinical topics. Content includes patient communication strategies, re-care and periodontal maintenance protocol, the referral process, air-powder polishers, advanced dental hygiene instruments, and power-driven scaling instruments.
Prerequisites: Quarter I & II courses

DHYG 1230 Clinical Dental Hygiene I
Total Course Hours: 96 (0 Theory, 0 Lab, 96 Clinical) Quarter Credits: 3.0
This course applies previously learned skills in a clinical setting under direct professional supervision. Content emphasizes patient care through the application of assessment techniques, treatment planning, calculus detection, and basic instrumentation and procedures. Students are evaluated with the expectation of demonstrating beginning competency level in direct patient care.
Prerequisites: Quarter I & II courses

DHYG 1110 Biomaterials
Total Course Hours: 60 (30 Theory, 30 Lab, 0 Clinical) Quarter Credits: 4.5
This course is a survey of materials used in dentistry, dental hygiene, and dental laboratory procedures. The chemical and physical properties of dental materials will be discussed with an emphasis on the handling, manipulation, and rationale for use of materials used in dental hygiene and dentistry.
Prerequisites: Quarter I & II courses

DHYG 1030 Periodontics
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Quarter Credits: 4.5
This course examines the effects of periodontal disease on overall health. Through exploration of the epidemiology, etiology, microbiology, and immunology of various periodontal diseases, students develop skills that enable them to differentiate healthy and diseased periodontium. Further, they will learn to evaluate the extent and severity of the periodontal diseases and develop and appropriate clinical treatment recommendations.
Prerequisites: Quarter I & II courses

DHYG 1040 Pharmacology for Dental Hygiene
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Quarter Credits: 4.5
This course covers the basic components of pharmacology with emphasis on the interaction with the biologic systems in the body as well as those that specifically affect oral health. Topics include therapeutic use, pharmacokinetics, pharmacodynamics, pharmacologic effects, adverse effects, drug interactions, and contraindications, among others.
Prerequisites: Quarter I & II courses

Quarter IV
PSYC 1000 Psychology
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Quarter Credits: 3.0
This course introduces basic concepts in human psychology through an overview of the foundations of the discipline and a more in-depth look at contemporary approaches in the field. Among the many topics included are mental health, well-being, behavior, cognition, personality traits, life-span development, social interactions, and various therapies used to treat psychological disorders.
Prerequisites: Quarter I, II, & III courses

DHYG 1240 Dental Hygiene II
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Quarter Credits: 4.5
This course integrates the cognitive, psychomotor, and affective foundations of dental hygiene practice through exposure to increasingly complex patient cases, development of advanced instrumentation skills, individualized risk assessment, dental management of various special needs and/or medically compromised patients, and case management skills. Topics also include evidence-based treatment for nonsurgical periodontal therapy, evaluation of treatment outcomes, and professional development strategies.
Prerequisites: Quarter I, II, & III courses

DHYG 1250 Clinical Dental Hygiene II
Total Course Hours: 120 (0 Theory, 0 Lab, 120 Clinical) Quarter Credits: 4.0
This course introduces new concepts and techniques while providing opportunities to apply acquired skills and knowledge in the clinical setting under direct supervision. Students are expected to demonstrate increased proficiency in patient assessment, diagnosis, management, and dental hygiene care planning. Topics and skills addressed include advanced instrumentation and communication techniques, care of oral prostheses, and cultural competence, among others. Students complete a periodontal case study to demonstrate ability to evaluate and implement evidence-based practice techniques.
Prerequisites: Quarter I, II, & III courses

DHYG 2020 Patient/Pain Management
Total Course Hours: 75 (30 Theory, 45 Lab, 0 Clinical) Quarter Credits: 5.0
This course conveys a working knowledge of theoretical and practical applications of various physical, chemical, and psychological modalities intended for pain and anxiety management. Topics address the safe, ethical, legal, and proficient administration of local anesthesia and nitrous oxide in the clinical setting.
Prerequisites: Quarter I, II, & III courses

DHYG 2000 General/Oral Pathology
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Quarter Credits: 4.5
This course introduces general pathology concepts relevant to systemic and oral conditions. Discussion topics address recognition, description, and assessment of characteristics that deviate from normal findings. Students apply critical thinking skills to evaluate case studies that include laboratory, clinical, and radiographic data designed to elicit differential diagnoses of oral lesions.
Prerequisites: Quarter I, II, & III courses

Quarter V
SOCI 1000 Sociology
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Quarter Credits: 3.0
This course examines the sociological perspective of human behavior. Content addresses the structure and function of human societies and the interaction of people within societies. Topics include cultural belief systems, economic and political influences, and social classes, among others.
Prerequisites: Quarter I, II, III, & IV courses

DHYG 2200 Dental Hygiene III
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Quarter Credits: 4.5
This course applies concepts and principles introduced in earlier dental hygiene courses and further explores the dental management of various special needs and/or medically compromised patients. Emphasis is on increasingly complex cases that are designed to develop critical thinking skills and that emphasize appropriate assessment and planning techniques for a variety of special needs populations and practice-related situations.
Prerequisites: Quarter I, II, III, & IV courses

DHYG 2210 Clinical Dental Hygiene III
Total Course Hours: 144 (0 Theory, 0 Lab, 144 Clinical) Quarter Credits: 4.5
This course applies increasingly complex knowledge and skills acquired in earlier Quarters in patient assessment, management, treatment, evaluation, and preventive measures as part of comprehensive patient care. Students are evaluated with the expectation of demonstrating increased proficiency in direct patient care.
Prerequisites: Quarter I, II, III, & IV courses

DHYG 2010 Nutrition & Cariology
Total Course Hours: 36 (36 Theory, 0 Lab, 0 Clinical) Quarter Credits: 3.6
This course covers foundational biochemistry of nutrition, specific nutritional requirements throughout the life stages, special requirements for systemic diseases, and how nutrition relates to oral health and disease. These nutritional concepts are then applied to the field of cariology as it relates to the development, function, and progression or reversal of caries. Advanced topics relative to dental caries include pathophysiology, diagnosis, risk assessment, development of appropriate prevention and therapeutic strategies, and trends in caries research.
Prerequisites: Quarter I, II, III, & IV courses

DHYG 2100 Community & Public Dental Health I
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Quarter Credits: 3.0
This course introduces public health concepts and practices relevant to the field of dental hygiene. Content includes epidemiology, disease prevention, and advocacy for community access to dental care. Students apply critical thinking skills to explore various research-related topics that incorporate biostatistics, study methods, and other considerations to advance knowledge and literature review competence. Emphasis is on community outreach into underserved area/populations.
Prerequisites: Quarter I, II, III, & IV courses

Quarter VI

DHYG 2110 Community & Public Dental Health II

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Quarter Credits: 3.0

This course reinforces public health concepts and practices relevant to the field of dental hygiene. Content focuses on preparing students to evaluate, assess, and then identify appropriate treatment methodologies for patients with medical, physical, and other special considerations. Students apply critical thinking skills to explore various research-related topics that incorporate biostatistics, study methods, and other considerations to advance knowledge and literature review competence. Emphasis is placed on community outreach into underserved areas/ populations.

Prerequisites: Quarter I, II, III, IV, & V courses

DHYG 2130 Review of Dental Hygiene

Total Course Hours: 50 (50 Theory, 0 Lab, 0 Clinical) Quarter Credits: 5.0

This course provides a comprehensive review of the theory, concepts, and techniques taught in the preceding Quarters to prepare students for the National Board Dental Hygiene Examination. Students participate in study groups to identify study topics, discuss case studies, and review practice questions.

Prerequisites: Quarter I, II, III, IV, & V courses

DHYG 2220 Dental Hygiene IV

Total Course Hours: 36 (36 Theory, 0 Lab, 0 Clinical) Quarter Credits: 3.5

This course applies the concepts and principles introduced in earlier dental hygiene courses and further explores the dental management of various special needs and/or medically compromised patients. Emphasis is on the dental management for special needs populations including pertinent legislation and access to care issues, student preparation for the clinical board exam, and preparing the student for progression into the dental practice.

Prerequisites: Quarter I, II, III, IV, & V courses

DHYG 2230 Clinical Dental Hygiene IV

Total Course Hours: 144 (0 Theory, 0 Lab, 0 Clinical) Quarter Credits: 4.5

This course assesses clinical competency in preparation for professional employment in which students assess, plan, treat, and evaluate outcomes for patients with diverse medical, dental, and social histories. Students may participate in clinics designed to simulate private practice. Students are evaluated with the expectation of demonstrating advanced proficiency in direct patient care.

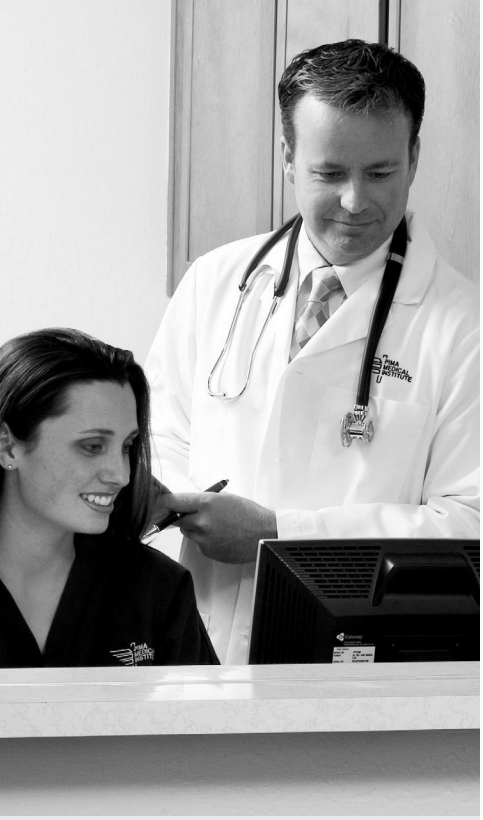
Prerequisites: Quarter I, II, III, IV, & V courses

DHYG 2120 Principles of Dental Hygiene Practice

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Quarter Credits: 3.0

This course reinforces knowledge of prior content with a focus on career readiness. Students prepare for their transition from an academic setting to the dental practice environment through various activities designed to enhance opportunities for employment. Discussion topics include practice management, legal and ethical principles, and professional responsibilities and expectations.

Prerequisites: Quarter I, II, III, IV, & V courses



Health Care Administration

Objective: To prepare students with the industry knowledge and professional skills necessary for entry-level employment in the administrative health care field. A curriculum focused on basic business, administrative, and organizational concepts of health care will also prepare students to further their education in an advanced degree program.

Graduates of this program receive an Associate of Applied Science Degree.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, applicants can apply for the qualified advanced entry option to accelerate into semester three of the five-semester program by transferring 24 credits under the following conditions: 12 of the 24 transfer credits must be from a health care field. PMI certificate programs that block-transfer into semester III include Dental Assistant (except Dental Assistant - California campuses), Health Care Administration Certificate, Medical Assistant, Medical Billing and Coding, Pharmacy Technician, and Sterile Processing Technician. Transfer credit requirements are listed in the Prospective Students section of this catalog.

Health Care Administration • Course Descriptions

Semester I

CCL 100 Computer Literacy
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
This course provides a survey of the responsible and ethical uses of computers and related devices in academic and medical settings. Through demonstration and hands-on experience, students acquire a general understanding of computer technology. Topics include but are not limited to common terminology, hardware/software components, and applications used in basic word processing, spreadsheets, and presentations. Students utilize technology to retrieve, evaluate, and synthesize information from diverse sources and points of view.
Prerequisites: None

CMT 115 Medical Terminology
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course focuses on the development of a basic framework for the language of medicine. Through memorization and practice in spelling and pronunciation of medical roots, suffixes, and prefixes, students learn to create, analyze, and apply medical terms as they relate to various anatomical, physiological, and pathological conditions. Medical records and reports are introduced to provide opportunities for students to apply the knowledge within the clinical environment.
Prerequisites: None

CCM 101 Communications
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course introduces foundational concepts of human communication and enables students to develop their awareness and effectiveness as communicators in social, professional, and interpersonal situations. Students explore verbal and nonverbal communication, communication styles, speaking and listening skills, and cultural factors that influence communication. Basic internet research skills, source citation, and effective interpretation of information are also addressed.
Prerequisites: None

BIO 121 Anatomy, Physiology, and Pathology
Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0
This course examines the structure and function of the systems within the human body. It also incorporates the interrelationships between the structures and systems as well as common diseases and conditions associated with each system. The course content also includes foundational knowledge regarding the diagnosis, treatment, and prognosis for various diseases.
Prerequisites: None

Semester II

HCA 100 Office Management
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course introduces students to the daily operations of the medical office environment, including basic policies/procedures, appointment scheduling, telephone etiquette, patient reception and processing, billing and coding procedures, and financial and medical records management.
Prerequisites: None

HIT 155 Electronic Health Records
Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0
This course provides an overview of electronic health records (EHR) and the significance of EHR systems within the health care field. Students participate in hands-on activities to practice and hone their abilities to navigate and understand the EHR environment and general coding concepts.
Prerequisites: None

HCA 175 Medical Law and Ethics
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course introduces students to legal principles and ethical issues that impact the health care administrative setting. Students learn about the legal system and relevant laws and regulations as they apply to health care. Topics related to legal aspects of health care business, patient care, health information, and employment are explored. Differentiation of legal and ethical issues is emphasized.
Prerequisites: None

HIT 135 Introduction to Insurance
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course addresses insurance terminology, coding basics for third-party reimbursement, and types of government-sponsored insurance including workers' compensation, Medicare, and Medicaid. Students complete sample insurance claim forms.
Prerequisites: None

Health Care Administration • Course Descriptions

Semester III

ENG 101 English Composition I
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides students with fundamental skills necessary for academic and professional writing. Students learn and practice the strategies and processes for planning, organizing, writing, editing, and revising written compositions. Students are introduced to the process of connecting writing and critical thinking skills. Learning to integrate information from source material in formal academic compositions is emphasized.
Prerequisites: None

CPT 201 Computer Fundamentals
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course introduces students to the Windows environment and to Windows-based applications. Through a hands-on approach, students will achieve a working knowledge of Windows, Microsoft Word and Excel, and a brief introduction to Microsoft PowerPoint presentation software.
Prerequisites: CCB 100 Computer Basics or CCL 100 Computer Literacy

MTH 210 Math Applications
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides the student with the fundamentals of college algebra. Mathematical operations covered include fractions, decimals, algebraic equations, basic statistics, word problems, and graphing.
Prerequisites: CMF 95 Math Fundamentals

HCA 201 Introduction to the Health Care System
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course introduces the basic structures and operations that have formed the present-day health care system in the United States. Students explore the broad and often complex range of concepts associated with the health care system and health care organizations, including individual services, cost structures, reform movements, and quality control, among others.
Prerequisites: None

Semester IV

HCA 210 Business Communications
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course focuses on the practice of effective communication and writing within the contexts of business and the health care profession. Students analyze the psychology, semantics, planning, and principles of effective business writing.
Prerequisites: ENG 101 English Composition I

HCA 215 Health Care Economics
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course entails study of fundamental principles of economic theory and concepts that can be applied to producing, delivering, and financing health care. Concepts include supply and demand in health care markets, the challenges of delivering cost-effective health care, market competition, resource allocation, and stakeholder roles in health economics. Students are introduced to economic tools, such as cost-benefit analysis, to inform healthcare decision-making.
Prerequisites: None

HCA 220 Health Care Management
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course explores various health care settings ranging from hospitals to nursing homes to clinics. Issues addressed include ethics, cost management, strategic planning and marketing, information technology, and human resources.
Prerequisites: None

SOC 115 Introduction to Sociology
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides a broad overview of sociology and its application to everyday life. Major theoretical perspectives, concepts, and methodologies are presented. Students will examine the influence of social groups and institutions, culture, and social structure on the process of socialization and will also explore inequality and its effects upon these social contexts. This course leads to an understanding of the sociological perspective of human behavior.
Prerequisites: None

Semester V

PSY 201 Psychology
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course examines human behavior and its biological foundations, with emphasis on basic concepts and theories. The range of topics addressed includes adaptation, motivation, memory, learning, personality, and emotions. Human interactions in various contexts are also explored.
Prerequisites: None

HCA 230 Accounting for Health Care Management
Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0
This course introduces the fundamentals of financial and managerial accounting with an emphasis on the role of accounting in the management of health care organizations. The course addresses the users and uses of financial and managerial reports related to various types of health care entities. Emphasis is on topics such as financial statement preparation, revenue cycle management, budgeting and ratio analysis. Students will also have the opportunity to develop skills performing basic accounting functions utilizing MS Excel.
Prerequisites: CPT 201 Computer Fundamentals and MTH 210 Math Applications

HCA 221 Human Resource Management
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course is designed to provide a basic understanding of the various aspects of personnel management. Emphasis is placed on such topics as communication, recruiting, interviews/selection, promotion, performance appraisals, and job satisfaction.
Prerequisites: None

HCA 270 Introduction to Project Management
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides a high level overview of project management. Students gain a basic understanding of project management principles, methodologies, and techniques, including project life cycle and the technical, organizational, and behavioral aspects of project management. Students explore the benefits of project management in health care. The course culminates in practical applications of concepts learned throughout the program in a health care administration mini-capstone project.
Prerequisites: Semester I, II, III, and IV courses

Medical Laboratory Technician

Objective: To develop in students the intrapersonal and professional skills needed to perform as competent entry-level medical laboratory technicians through didactic instruction, hands-on laboratory practice, and clinical experiences. Among the topics covered in the curriculum are fundamental testing procedures for various body fluids, evaluation of test results, lab safety, personal protective equipment, and other topics necessary to be effective members of the medical laboratory team.

Graduates of this program receive an Associate of Applied Science Degree and are eligible to apply to take the American Society for Clinical Pathology (ASCP) Medical Laboratory Technician (MLT) certification examination.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required. Refer to the program specific Prospective Student Handout for more information.

Semester I					
Course #	**Course**	**Theory**	**Lab**	**Extern**	**Credits**

Medical Laboratory Technician • Course Descriptions

Note: Refer to the program's Prospective Student Handout at the campus for information on the delivery method for each course.

Semester I

AP 120 Anatomy and Physiology I
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course focuses on the fundamentals of human anatomy and physiology. Topics include basic cellular function, organization of the body, anatomy and physiology of tissues and organs, and the structures, functions, and pathophysiology of the integumentary, muscular, skeletal, and nervous systems. Knowledge gained in this course prepares students for more complex theoretical and practical applications in subsequent technical courses.
Prerequisites: None

BIO 123 General Biology
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course introduces the fundamentals of biology. Students gain an understanding of cellular biology, genetics, metabolism, mitosis, and meiosis and how these concepts relate to biotechnology. Knowledge gained in this course prepares students for more complex theoretical and practical applications in subsequent technical courses.
Prerequisites: None

CMT 120 Medical Terminology
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course introduces an extensive medical vocabulary through memorization and practice in spelling and pronunciation of medical roots, suffixes, and prefixes. Students learn to create, analyze, and apply medical terms. Students also learn to use the word building system to accurately define medical terms.
Prerequisites: None

MTH 160 Math for Medical Specialties
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
This course introduces mathematical concepts used in general chemistry, biochemistry, hematology, and basic physics that are needed for proper calculation in a medical setting. Knowledge gained in this course prepares students for more complex theoretical and practical applications in subsequent technical courses.
Prerequisites: None

MLT 101 Introduction to Medical Lab
Total Course Hours: 45 (30 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5
This course introduces students to OSHA standards, personal protective equipment, and the care and use of laboratory equipment. In addition, students learn basic skills in hematology, immunohematology, immunology, urinalysis, microbiology, chemistry, and parasitology. Quality assurance, quality control, and documentation requirements in laboratory reporting are also presented.
Prerequisites: None

MLT 112 Instrumentation and Quality Control
Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5
This course introduces various laboratory instrumentation, linearity studies, and how to incorporate all aspects of quality assurance and quality control required in the laboratory. Topics include laboratory safety, appropriate use of equipment, interpreting quality control results, and the importance of policies and procedure.
Prerequisites: None

Semester II

AP 130 Anatomy and Physiology II
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
This course focuses on the fundamentals of human anatomy and physiology. Subjects include the organization, structures, and functions of the cardiovascular, respiratory, endocrine, lymphatic, digestive, urinary, and reproductive systems. Content also addresses hormones, blood and its components, and immunity. Knowledge gained in this course prepares students for more complex theoretical and practical applications in subsequent technical courses.
Prerequisites: : Semester I Courses

CCM 116 Communication for Health Care Professionals
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
This course addresses the effective use of oral, written, and electronic communication skills. Students learn situational critical thinking in order to practice culturally competent communication using both verbal and nonverbal methods. They also identify grammatical errors in written communication through technical and professional writing skills application, and demonstrate oral presentation skills through the presentation of various medical topics. Students also explore legal and ethical aspects of communication in health care, including HIPAA, security concerns in the use of search engines, and electronic communication and recordkeeping.
Prerequisites: None

CHM 101 General and Organic Chemistry
Total Course Hours: 45 (30 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5
This course introduces foundational principles in general and organic chemistry, including vocabulary, molecular structures, methods of measurement, quantum theory, the types of bonding, the properties of gases, the types of energy, and the properties of acids, bases, and salts. To support theory, students perform various chemical-reaction experiments. Knowledge gained in this course prepares students for more complex theoretical and practical applications in subsequent technical courses.
Prerequisites: : Semester I Courses

MLT 122 Microbiology I
Total Course Hours: 90 (30 Theory, 60 Lab, 0 Extern) Semester Credits: 4.0
This course introduces the theories and principles applicable to clinical microbiology. Students learn the different biosafety levels and the required personal protective equipment required for each. Topics include the geographical distribution, life cycle, pathology, morphology, and clinical diagnosis of pathogenic and nonpathogenic organisms. Students learn basic Gram and Wright staining techniques and explore the various methods of collection of specimens for microbiology testing. Content also addresses the different types of growth media and how they are used to grow, isolate, and identify bacteria, viruses, yeast, and fungi.
Prerequisites: : Semester I Courses

MLT 141 Clinical Chemistry
Total Course Hours: 45 (30 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5
This course introduces the theory and clinical interpretation of carbohydrates, lipids, and proteins needed for clinical laboratory testing. Students learn about manual and automated laboratory testing methods completed in the clinical chemistry department. Topics include laboratory standard operating procedures, quality assurance, and quality control standards for all chemistry tests performed. Content also addresses therapeutic drug monitoring as well as the theory, clinical interpretation, roles of enzymes, electrolytes, toxic substances, trace elements, steroids, hormones, and vitamins in homeostasis.
Prerequisites: : Semester I Courses

Semester III
CLE 100 Medical Law and Ethics
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course introduces the legal and ethical principles and practices in the workplace, particularly in health care settings. Topics include the laws that govern and limit professional scopes of practice, codes of ethics, ethical and legal issues, federal and state regulations, and medical negligence.
Prerequisites: Semesters I and II courses

MLT 123 Microbiology II
Total Course Hours: 75 (30 Theory, 45 Lab, 0 Extern) Semester Credits: 3.5
This course builds upon the theories and principles of microbiology previously explored in Microbiology I. Students explore microbial taxonomy, classification, nomenclature, genetics, metabolism, and structure of various organisms. Through culture, Gram staining, biochemical, and immunochemical testing techniques, students will recognize, isolate, and identify the most common bacterial, viral, parasitic, and fungal pathogens as well as identify their most common sites of infection. Additional topics include the principles of antimicrobial action and resistance.
Prerequisites: Semesters I and II courses

MLT 132 Hematology I
Total Course Hours: 90 (30 Theory, 60 Lab, 0 Extern) Semester Credits: 4.0
This course explores the practices and principles of theory and testing in the clinical hematology laboratory. Content addresses the use and function of the microscope in hematology testing as well as identification of blood-cell components and their role in homeostasis. Students participate in hands-on activities to learn and perform phlebotomy and slide-making/staining skills. They also perform complete blood counts, including white- and red-blood cell counts, platelet counts, hemoglobin determinations, hematocrit values, blood-smear differential, red-cell indices calculations, sedimentation rates, reticulocyte counts, and gene mutations.
Prerequisites: Semesters I and II courses

MLT 162 Immunology and Serology
Total Course Hours: 45 (30 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5
This course introduces the concepts of basic immunology. Students become familiar with the types of pathogens that can invade the body, the different immune responses to those pathogens, and the cells that are involved in those responses. Content addresses the structure and creation of antibodies and pathogenic conditions related to hypersensitivity and autoimmunity. Students learn about the clinical manifestations of various diseases and perform serological testing for the presence or absence of antigens and antibodies related to them.
Prerequisites: Semesters I and II courses

PHL 115 Phlebotomy
Total Course Hours: 60 (15 Theory, 45 Lab, 0 Extern) Semester Credits: 2.5
This course introduces students to proper collection, handling, and processing of blood using various collection methods. Content focuses on the general equipment and supplies needed for phlebotomy as well as the different types of containers needed for clinical testing. Students perform capillary and venipuncture collection techniques. Topics include the order of draw, procedural errors that lead to blood collection failure, and how to respond to adverse patient reactions. Students demonstrate an understanding of universal precautions, appropriate bedside manner, possible preanalytical errors, and proper labeling.
Prerequisites: Semesters I and II courses

Semester IV

CMS 101 Career Marketing Strategies

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

Students create a portfolio including resumes, references, cover letters, and thank-you letters. Students learn how to evaluate job offers and skills and participate in mock interviews.

Prerequisites: Semesters I, II, and III courses

MLT 133 Hematology II

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course continues the practices and principles of theory and testing in the clinical hematology laboratory that were introduced in Hematology I. Students examine abnormal blood smears to include erythrocyte destruction, leukemias, myeloproliferative disorders, hemoglobinopathies, and thalassemias and will discuss the clinical manifestations of each. Topics include cytochemical staining, flow cytometry,and cytogenetics testing methods that are used to identify a variety of hematologic diseases.

Prerequisites: Semesters I, II, and III courses

MLT 171 Urinalysis and Body Fluids

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course introduces the anatomy and physiology of the kidney as well as the physical, chemical, and microscopic components of urine. Students investigate the relationship of pathological conditions in the renal system to the diagnosis of metabolic diseases and other disorders. They also explore the proper processing, handling, and testing of other bodily fluids.

Prerequisites: Semesters I, II, and III courses

MLT 182 Hemostasis and Coagulation

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course introduces the clotting mechanisms, platelet structure and function, and the maintenance of vascular integrity including both intrinsic and extrinsic systems that are required for hemostasis. Students explore thrombotic diseases, platelet disorders, hemorrhagic disorders, factor deficiencies, and the testing and treatment of these disorders.

Prerequisites: Semesters I, II, and III courses

MLT 201 Immunohematology and Blood Banking

Total Course Hours: 90 (30 Theory, 60 Lab, 0 Extern) Semester Credits: 4.0

This course introduces the importance of blood typing in the clinical laboratory. Students build on their knowledge of antigen-antibody testing methods in order to understand and perform ABO grouping, Rh typing, compatibility testing, antibody identification, and component therapy selection. They also explore donor screening, donor blood processing, and appropriate quality control and quality assurance procedures.

Prerequisites: Semesters I, II, and III courses

Semester V

MLT 205 Medical Laboratory Review

Total Course Hours: 90 (30 Theory, 60 Lab, 0 Extern) Semester Credits: 4.0

This course is designed to prepare students for the application process and testing procedures needed for completion of their certification exam. Content provides review of all laboratory materials, competencies, and guidelines necessary for completion of the exam.

Prerequisites: Semesters I, II, III, and IV courses

MLT 210 Externship

Total Course Hours: 400 (0 Theory, 0 Lab, 400 Extern) Semester Credits: 8.5

The purpose of this course is to provide students with a clinical laboratory experience in a CLIA-approved laboratory. Clinical experiences expose students to the necessary skills required of the profession. The clinical experience covers the major sections of clinical laboratory testing including chemistry, hematology/coagulation, body fluids/urinalysis, immunology/serology, immunohematology, and microbiology.

Prerequisites: Semesters I, II, III, and IV courses and MLT 205

Radiography

Objective: To develop in students the intrapersonal and professional skills needed to perform as competent entry-level radiologic technologists through didactic instruction, hands-on laboratory practice, and clinical experiences. Among the topics covered in the curriculum are anatomy and physiology, communication, medical terminology, methods of patient care, psychology, ethics, radiographic techniques, image analysis, and quality assurance, and other topics necessary to be effective members of the radiography team.

Graduates of the program receive an Associate of Applied Science Degree. Graduates are qualified to apply to take the American Registry of Radiologic Technologists (ARRT) examination for certification.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required. Refer to the program specific Prospective Student Handout for more information.

Radiography • Course Descriptions

Note: Hybrid delivery is offered only at Chula Vista, Denver, Las Vegas, Seattle, and Tucson campuses. Refer to the Prospective Student Handout at these campuses for course-specific delivery methods in these hybrid programs.

Semester I

BIO 154 Anatomy and Physiology I
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
This course provides the student with knowledge of the structure and function of the human body. Course content includes the structure and function of the integumentary, muscular, and skeletal systems. Course content also addresses the roles of cellular, tissue, and organ structures with each system and within the human body as a whole.
Prerequisites: None

CCM 154 Communications
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
This course addresses a broad range of communication skills and provides students with an overview of interpersonal, technical, and professional communications. The topics include but are not limited to effective oral and written communication styles, adaptation and communication within groups, active listening techniques, technical and professional writing methods, presentations, and communicating on a level that encompasses diversity. Students will apply critical thinking skills toward group discussions and evaluation of communication styles from a professional point of view.
Prerequisites: None

CMT 154 Medical Terminology
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course focuses on the development of a basic framework for the language of medicine. Through memorization and practice in spelling and pronunciation of medical roots, suffixes, and prefixes, students learn to analyze and apply medical terms.
Prerequisites: None

MTH 154 Algebra
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides the student with the fundamentals of college algebra. Mathematical operations covered include fractions, decimals, algebraic equations, basic statistics, word problems, and graphing.
Prerequisites: None

RAD 145 Radiographic Physics
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides an in-depth analysis of radiologic physics. Some of the topics and principles covered include atomic structure, electricity, electromagnetism, equipment operation and maintenance, x-ray production, and x-ray interactions.
Prerequisites: None

RAD 155 Positioning I
Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0
This course covers basic terminology, anatomy, and radiographic procedures. Laboratory practice is through peer simulation and/or radiographic exposure of man-made models.
Prerequisites: None

Semester II

BIO 164 Anatomy and Physiology II
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
A continuation of BIO 154, course content includes the structure and function of the endocrine, nervous, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems.
Prerequisites: BIO 154 Anatomy and Physiology I

CLE 164 Medical Law and Ethics
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
Students are provided an overview of ethics and the law as they apply to medical professions and practice. Topics include scope of practice, legal issues, ethical considerations, patient rights, informed consent, standards of care, documentation, and workplace issues, including employment discrimination.
Prerequisites: None

RAD 165 Positioning II
Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0
This course is a continuation of RAD 155. Students will also learn advanced positioning skills for age-specific populations. Laboratory practice is through peer simulation and/or radiographic exposure of man-made models.
Prerequisites: Semester I courses

RAD 175 Methods of Patient Care
Total Course Hours: 53 (45 Theory, 8.0 Lab, 0 Extern) Semester Credits: 3.0
Students are instructed in basic patient-care skills as they apply to radiologic technology. Emphasis is placed on safety, infection control, aseptic techniques, administration of contrast media, venipuncture, pharmacology, patient assessment, care of the critical patient and emergency care, and the care of tubes, catheters and vascular lines. In California, this course will provide the education and training for venipuncture certification.
Prerequisites: Semester I courses

RAD 185 Principles of Exposure
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course covers the factors that affect the diagnostic quality of radiographic images. Topics covered include image acquisition, digital imaging systems, image processing, beam limitation, grids, contrast, receptor exposure, spatial resolution, and structural considerations.
Prerequisites: Semester I courses

Semester III
HST 205 Nevada History and US Constitution (Las Vegas Campus Only)
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
A survey of the history of the state of Nevada with focus on mining, gaming, government and recent developments in population expansion. The course will review the Nevada State Constitution and legal ramifications. The essentials of the US Constitution will also be examined. The course is designed to meet Nevada History/US Constitution Associate degree requirement.
Prerequisites: None

RAD 255 Advanced Imaging
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
This course presents radiography skills and equipment used in various imaging procedures and advanced modalities. Topics include but are not limited to cardiovascular and interventional radiography, computed tomography imaging, magnetic resonance imaging, mammography, bone densitometry, ultrasound, nuclear medicine, and radiation oncology.
Prerequisites: Semesters I and II courses

RAD 265 Radiographic Biology
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
This course provides the student with instruction on x-ray interactions with matter, radiation effects on the molecular and cellular levels, acute and long-term radiation responses, and radiation protection principles.
Prerequisites: Semesters I and II courses

RAD 201 Clinical Externship I
Total Course Hours: 420 (0 Theory, 0 Lab, 420 Extern) Semester Credits: 9.0
This course provides clinical experience under the supervision of clinical staff and faculty correlated with theories presented in the classroom. Students will develop clinical competence by performing a variety of radiographic procedures on a diverse patient population. Student learning and competence will be determined in part through frequent critique and evaluation, as well as specific formative and summative assessment tools. Students are expected to demonstrate increasing clinical skill and competence.
Prerequisites: Semesters I and II courses

Semester IV
PSY 174 Introduction to Psychology
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
This course introduces basic concepts in human psychology through an overview of the foundations of the discipline and a more in-depth look at contemporary approaches in the field. Among the many topics included are mental health, well-being, behavior, cognition, personality traits, life-span development, social interactions, and various therapies used to treat psychological disorders.
Prerequisites: None

RAD 275 Pathology I
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course provides an overview of radiographic pathology. Topics include pathologies of the musculoskeletal, respiratory, gastrointestinal, hepatobiliary, and urinary systems.
Prerequisites: Semesters I, II, and III courses

RAD 202 Clinical Externship II
Total Course Hours: 420 (0 Theory, 0 Lab, 420 Extern) Semester Credits: 9.0
This course is a continuation of RAD 201 and provides the student with clinical experience under the supervision of clinical staff and faculty. Students will develop clinical competence by performing a variety of radiographic procedures on a diverse patient population. Student learning and competence will be determined in part through frequent critique and evaluation, as well as specific formative and summative assessment tools. Students are expected to demonstrate increasing clinical skill and competence.
Prerequisites: Semesters I, II, and III courses

Semester V

RAD 285 Pathology II

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course is a continuation of RAD 275. Topics include pathologies of the hematopoietic, cardiovascular, nervous, endocrine, and reproductive systems, and diseases and trauma.

Prerequisites: Semesters I, II, III, and IV courses

RAD 295 Image Quality and Analysis

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course builds upon the foundations of classroom theory and practical externship in the critique of radiographic image quality, with an emphasis on image analysis.

Prerequisites: Semesters I, II, III, and IV courses

RAD 203 Clinical Externship III

Total Course Hours: 420 (0 Theory, 0 Lab, 420 Extern) Semester Credits: 9.0

This course is a continuation of RAD 202 and provides the student with clinical experience under the supervision of clinical staff and faculty. Students will develop clinical competence by performing a variety of radiographic procedures on a diverse patient population. Student learning and competence will be determined in part through frequent critique and evaluation, as well as specific formative and summative assessment tools. Students are expected to demonstrate increasing clinical skill and competence.

Prerequisites: Semesters I, II, III, and IV courses

Semester VI

RAD 299 Registry Review

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is designed to prepare students for examination for certification by the American Registry of Radiologic Technologists (ARRT).

Prerequisites: Semesters I, II, III, IV, and V courses

RAD 204 Clinical Externship IV

Total Course Hours: 420 (0 Theory, 0 Lab, 420 Extern) Semester Credits: 9.0

This course is a continuation of RAD 203 and provides the student with clinical experience under the supervision of clinical staff and faculty. Students will develop clinical competence by performing a variety of radiographic procedures on a diverse patient population. Student learning and competence will be determined in part through frequent critique and evaluation, as well as specific formative and summative assessment tools. Students are expected to demonstrate the clinical skill and competence as required of an entry-level radiographer.

Prerequisites: Semesters I, II, III, IV, and V courses

I had gone to college for several years and had finally determined my career path. I first came to PMI in 2005 after the college I was attending in Hawaii discontinued their radiologic technologist program. I chose PMI because it was the best and fastest way to get to my goal. Like many students, I needed to bring in an income while in school. So anytime my school schedule changed during my clinical externships, I found a new job that would accommodate my schedule. During PMI's bachelor program I was a new mom and had both a full- and part-time job. Both programs were completely doable during these times in my life as long as I committed myself and knew that each one would better my future.

My instructors were knowledgeable and completely prepared me for my profession. I was hired directly out of school at one of my externship sites where I've been working for nearly 10 years. I continued to advance myself through education; getting my CT certification and my bachelor's degree through PMI's Online program. The idea of teaching future technologists and being able to share my knowledge got me excited, so I began teaching part time at PMI. Eventually, I became a full time instructor.

PMI gave me a great start on my career path. My goal now is to share that same knowledge and passion with my students. Thanks PMI!

Jolene Pobrislo
Associate Degree, Radiography, Tucson Campus
Bachelor Degree, Radiologic Sciences, Online Education

Respiratory Therapy

Objective: To develop in students the intrapersonal and professional skills needed to perform as competent entry-level respiratory therapists through didactic instruction and hands-on laboratory and clinical experiences. Among the topics covered in the curriculum are skills in advanced respiratory care techniques including neonatal, pediatric, and adult special care procedures, general and advanced pharmacology, cardiopulmonary disease, patient assessment, and therapeutics.

Graduates of the program receive an Associate of Applied Science Degree and are eligible to apply to take the National Board for Respiratory Care Therapist Multiple-Choice (TMC) Examination. Those who meet the threshold on the TMC exam are eligible to take the Clinical Simulation Examination (CSE) to obtain the Registered Respiratory Therapist (RRT) credential.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required. Refer to the program specific Prospective Student Handout for more information.

Respiratory Therapy • Course Descriptions

Note: Hybrid delivery is offered only at Mesa, Denver, Las Vegas, and Renton campuses. Refer to the Prospective Student Handout at these campuses for course-specific delivery methods in these hybrid programs.

Semester I

MT 103 Math Applications
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
This course provides the student with the fundamentals of college algebra. Content includes fractions, decimals, percents, ratios and algebraic equations. Additional topics include a review of the metric system, scientific notation, graphing and dosing calculations.
Prerequisites: None

BIO 127 Anatomy and Physiology
Total Course Hours: 70 (70 Theory, 0 Lab, 0 Extern) Semester Credits: 4.5
The objective of this course is to provide the student with knowledge of the structure and function of the human body. Cells, tissues and organs are described and discussed as components of their respective systems. Course content includes the structure, function, and medical terminology for the following systems: integumentary, musculoskeletal, endocrine, cardiovascular (including blood, heart, blood vessels and circulation), lymphatic, immune, respiratory, digestive, urinary and reproductive systems.
Prerequisites: None

RES 116 Cardiac Anatomy and Physiology
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
Provides an in-depth study of the heart, including the functions of the heart, its components and the chemical and physical processes involved.
Prerequisites: None

RES 118 Pulmonary Anatomy and Physiology
Total Course Hours: 75 (75 Theory, 0 Lab, 0 Extern) Semester Credits: 5.0
The course provides an in-depth study of the lungs and their functions, including pulmonary structure and the physiology of gas transport. Topics include the anatomy of the airways and thorax and its relation to the function of gas movement in and out of the lungs. Pressure gradients, diffusion, perfusion and ventilation are studied in detail. The course will use formulae for arterial (CaO_2), alveolar (PAO_2), venous (CvO_2) and capillary (CcO_2) blood flow and gas exchange, oxygen delivery (DO_2) and consumption (VO_2). A detailed review of acid-base balances and interpretation of arterial blood gases is also an integral part of the course.
Prerequisites: None

CHP 111 Respiratory Sciences
Total Course Hours: 35 (35 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
This course introduces chemistry concepts of atomic theory, the use of the periodic chart, and chemical bonding and balancing equations. This course will also include an introduction to basic physics, which includes laws of gaseous particles and diffusion, fluid dynamics, relative humidity, temperature, conversion, pressure, and partial pressures.
Prerequisites: None

Semester II

HST 205 Nevada History and US Constitution (Las Vegas Campus only)
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
A survey of the history of the state of Nevada with focus on mining, gaming, government and recent developments in population expansion. The course will review the Nevada State Constitution and legal ramifications. The essentials of the US Constitution will also be examined. The course is designed to meet Nevada History/US Constitution Associate degree requirement. *(Las Vegas Campus only)*
Prerequisites: None

RX 151 Pharmacology
Total Course Hours: 40 (40 Theory, 0 Lab, 0 Extern) Semester Credits: 2.5
Presents major pharmacological agents used in treating cardiopulmonary diseases. Provides knowledge of pharmaceutical classification, drug action and modes of administration, the metric system, medications, and special handling procedures.
Prerequisites: RES 116 Cardiac Anatomy and Physiology and RES 118 Pulmonary Anatomy and Physiology

RES 131 Cardiopulmonary Diagnostics
Total Course Hours: 70 (40 Theory, 30 Lab, 0 Extern) Semester Credits: 3.5
This course presents an introduction to basic cardiopulmonary diagnostic testing. Topics include but are not limited to ABGs, ECGs, CXR, and pulmonary function testing, which includes the machines, equipment, and accessories utilized for diagnosis.
Prerequisites: RES 116 Cardiac Anatomy and Physiology and RES 118 Pulmonary Anatomy and Physiology

RES 141 Cardiopulmonary Diseases
Total Course Hours: 50 (50 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
In-depth study of cardiopulmonary diseases, the etiology of each disease, the clinical manifestations of each disease, and the appropriate management of the disease by the respiratory care practitioner.
Prerequisites: RES 116 Cardiac Anatomy and Physiology and RES 118 Pulmonary Anatomy and Physiology

RES 180 Respiratory Therapeutics I
Total Course Hours: 55 (30 Theory, 25 Lab, 0 Extern) Semester Credits: 2.5
The course provides an introduction to medical gas, storage systems, oxygen devices, monitoring systems, troubleshooting systems and the use of hyperbaric oxygen related to respiratory care.
Prerequisites: RES 116 Cardiac Anatomy and Physiology and RES 118 Pulmonary Anatomy and Physiology

PC 122 Patient Assessment
Total Course Hours: 35 (20 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5
Introduces the techniques of observation, palpation, percussion and auscultation, and performance of vital signs for head-to-toe patient evaluation. Also introduced are communication techniques for interaction with patients and their families.
Prerequisites: None

MB 120 Microbiology
Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course presents the basics of microbiology. Topics include bacteriology, virology, mycology, equipment processing, and infection control in the clinical setting.
Prerequisites: None

Semester III
RES 185 Respiratory Therapeutics II
Total Course Hours: 90 (40 Theory, 50 Lab, 0 Extern) Semester Credits: 4.0
This course covers the various therapeutic modalities used in respiratory care. Indications, side effects, hazards, and basis for application are stressed. Specific focus on technologies for airway clearance and hyperinflation.
Prerequisites: Semesters I and II courses

RES 242 Emergency Care
Total Course Hours: 50 (35 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5
This course provides knowledge of basic and advanced life support, triage techniques, and identification of pathophysiology. Topics include emergency care applications and management of drowning, hypo- and hyperthermia, shock, poisons, drug overdose, burns, diving accidents, and other types of trauma.
Prerequisites: Semesters I and II courses

RES 211 Critical Care Techniques
Total Course Hours: 55 (40 Theory, 15 Lab, 0 Extern) Semester Credits: 3.0
Instructional focus is centered on emergency management and maintenance of artificial airways according to AHA ACLS standards.
Prerequisites: Semesters I and II courses

RES 160 Respiratory Pediatrics
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
The focus of this course is to introduce assessment skills needed to treat the pediatric patient and to study diseases and appropriate therapies and resuscitative procedures particular to pediatrics.
Prerequisites: Semesters I and II courses

RES 201 Pulmonary Rehabilitation and Wellness
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course presents the basic elements required in designing the components of a cardiopulmonary rehabilitation program. Topics include community and individual health promotion, patient education, family training, smoking cessation programs, and how to deal with tobacco issues. Instruction also focuses on the importance and benefits of home health care.
Prerequisites: Semesters I and II courses

CCM 102 Healthcare Communications
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides an overview of the concepts and components of communication. Verbal and nonverbal communication, technical and professional writing, speaking and listening critically, evaluating and synthesizing material from diverse cultural sources and points of view, and other topics are included.
Prerequisites: None

Semester IV
RES 281 Introduction to Mechanical Ventilation
Total Course Hours: 120 (60 Theory, 60 Lab, 0 Extern) Semester Credits: 6.0
This course introduces the indications, mechanics, and physiologic effects of mechanical ventilation. Topics include initiation, monitoring, management, and discontinuance of mechanical ventilation.
Prerequisites: Semesters I, II, and III courses

RES 222 Advanced Patient Assessment
Total Course Hours: 50 (30 Theory, 20 Lab, 0 Extern) Semester Credits: 2.5
This course provides knowledge and application of advanced patient assessment techniques and skills in respiratory therapy. Interpretation of laboratory data and the nutritional status of the critical care patient are stressed.
Prerequisites: Semesters I, II, and III courses

RES 190 Respiratory Care Practicum I
Total Course Hours: 240 (0 Theory, 0 Lab, 240 Extern) Semester Credits: 5.0
This course addresses basic therapeutic modalities used by respiratory care practitioners in a hospital, which may include emergency room, medical/surgical, and pediatric general floor clinical settings. Included are modalities of aerosol therapy, humidity therapy, hyperinflation, oxygen therapy, chest physiotherapy, airway care, and arterial blood gas sampling and analysis. Learners will assess, analyze, and apply therapeutic modalities based upon patient outcomes.
Prerequisites: Semester I, II and III courses

Semester V
RES 290 Respiratory Care Practicum II
Total Course Hours: 240 (0 Theory, 0 Lab, 240 Extern) Semester Credits: 5.0
Structured to provide the learner with opportunities to apply respiratory care modalities in intensive care settings. Included are modalities for pulmonary functions, polysomnography, arterial blood gas sampling and interpretation of results, airway care, bronchoscopy, and ventilator management for adult and pediatric patients. The learner will have the opportunity to assess, analyze, and apply therapeutic modalities based upon patient outcomes, using appropriate AARC CPG-based upon ventilator management.
Prerequisites: Semesters I, II, III and IV courses

RES 251 Advanced Pharmacology
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides a review of respiratory specific drugs, cardiac drugs, sedatives, and pain maintenance drugs as they relate to cardiopulmonary function. Also addressed are vaccinations currently recommended for adult respiratory patients.
Prerequisites: Semesters I, II, III and IV courses

RES 260 Respiratory Perinatology
Total Course Hours: 50 (50 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
Provides an in-depth study of normal neonatal anatomy and physiology, labor and delivery, high-risk infants, resuscitation, mechanical ventilation, and common neonatal pathologies and modalities for their treatment.
Prerequisites: Semesters I, II, III and IV courses

RES 231 Advanced Pulmonary Diagnostics
Total Course Hours: 35 (35 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
An in-depth course that provides knowledge of arterial blood gas analysis, pulmonary function testing, chest radiography, cardiac stress testing, and assessment of sleep disorders.
Prerequisites: Semesters I, II, III and IV courses

Semester VI
RES 270 Cardiovascular Diagnostics
Total Course Hours: 50 (50 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
An in-depth course designed to instruct the learner on the application and analysis of electrocardiogram testing, EST interpretation, and hemodynamic monitoring.
Prerequisites: Semesters I, II, III, IV and V courses

RES 287 Advanced Mechanical Ventilation
Total Course Hours: 80 (50 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0
This course provides the student with knowledge of advanced concepts and applications of mechanical ventilation including high frequency ventilation to adult, pediatric, and neonatal patients.
Prerequisites: Semesters I, II, III, IV and V courses

RES 295 Respiratory Care Practicum III
Total Course Hours: 216 (0 Theory, 0 Lab, 216 Extern) Semester Credits: 4.5
This course involves clinical application of the diagnostic and therapeutic modalities presented in the classroom and lab setting. Emphasis is placed on neonatal, pediatric and adult mechanical ventilation, airway management, and cardiopulmonary monitoring of patients.
Prerequisites: Semesters I, II, III, IV, and V courses

RES 275 NBRC Review Course
Total Course Hours: 35 (35 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
This course is designed to prepare the learner for the National Board for Respiratory Care Therapist Multiple-Choice Examination (TMC) and the Clinical Simulation Examination (CSE).
Prerequisites: Semesters I, II, III, IV and V courses

Surgical Technology

Objective: To prepare competent, entry-level surgical technologists with curriculum that addresses the three learning domains: cognitive (knowledge), psychomotor (hands-on skills), and affective (professional behavior and conduct). Students develop the skills required to become an integral member of the surgical team, which includes surgeons, anesthesiologists, registered nurses, and other personnel who deliver patient care before, during, and after surgery.

Graduates of this program receive an Associate of Applied Science Degree. Students who successfully complete the program are eligible to take the National Board of Surgical Technology and Surgical Assisting (NBSTSA) Certified Surgical Technologist (CST) examination for certification. Students must attempt this examination prior to graduating from the program; if the exam is postponed for any reason, it could result in a delayed graduation date.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required.

At a Glance

Program Type: Associate's Degree

Surgical Technology • Course Descriptions

Note: Hybrid delivery is offered only at Chula Vista, Denver, Seattle, and Tucson campuses. Refer to the Prospective Student Handout at these campuses for course-specific delivery methods in these hybrid programs.

Semester I

BIO 122 Anatomy and Physiology I
Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5
This course is designed to provide a comprehensive foundation of the basic structure and function of the human body. Terminology related to body structures and function is introduced. Body organization, chemistry, cell structure, and tissues are reviewed. Systems covered include the integumentary, skeletal, muscular, nervous, and endocrine. The course also incorporates the interrelationships between the structures and systems, as well as the common illnesses and conditions associated with each system.
Prerequisites: None

CMT 131 Medical Terminology
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course focuses on the development of a basic framework for the language of medicine. Through memorization and practice in spelling and pronunciation of medical roots, suffixes, and prefixes, students learn to create, analyze, and apply medical terms.
Prerequisites: None

CCM 141 Communications
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course addresses a wide range of communication skills. Students will apply accepted communication conventions while considering context, situation, the influence of nonverbal actions, and audience factors such as diversity and roles.
Prerequisites: None

MTH 131 Mathematics Applications
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course presents calculation, conversion, and computation of fractions, decimals, percentages, measurements, ratios, and proportions.
Prerequisites: None

SUR 121 Introduction to Surgical Technology
Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0
This course is an introduction to the field of surgical technology. The history of the profession along with the roles and responsibilities of a surgical technologist are covered. The course content also includes foundational knowledge regarding the organizational, physical, and safety aspects of both hospitals and surgical suites. Legal and ethical issues are discussed.
Prerequisites: None

Semester II

BIO 132 Anatomy and Physiology II
Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5
A continuation of BIO 122, this course is designed to provide a comprehensive foundation to the basic structure and function of the cardiovascular, lymphatic, respiratory, digestive, urinary, reproductive, and endocrine systems. The course also incorporates the interrelationships between the structures and systems, as well as the common illnesses and conditions associated with each system.
Prerequisites: Semester I courses

BIO 141 Microbiology
Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5
This course presents the basics of microbiology. The course content focuses on microorganisms, pathogens, and disease transmission and prevention.
Prerequisites: Semester I courses

SUR 131 Surgical Patient Care
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course focuses on the physical and psychosocial aspects of the surgical patient. Topics include transporting, transferring, positioning patients, vital signs, skin preparation, urinary catheterization, open gloving, and draping, as well as decontamination, sterilization, and disinfection.
Prerequisites: Semester I courses

SUR 141 Principles of Surgical Technology
Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0
This course focuses on the responsibilities of a surgical technologist in the pre-, post-, and intraoperative phases of surgery. Emphasis is placed on ensuring patient safety through proper scrubbing, gowning, and gloving. Other topics covered include surgical instrumentation, wounds, wound healing, suture material, and stapling devices.
Prerequisites: Semester I courses

Surgical Technology • Course Descriptions

SUR 155 Surgical Lab I
Total Course Hours: 75 (0 Theory, 75 Lab, 0 Extern) Semester Credits: 2.5
This course provides opportunities to practice and refine skills in the pre-, intra-, and post-operative settings. Skills addressed include transporting, transferring, and positioning patients, performing vital signs, hand wash, surgical scrub, donning and doffing PPE, gowning and gloving self, gowning and gloving a team member, open gloving, draping, skin preparation, urinary catheterization, decontamination and sterilization procedures, disinfection, and room preparation and turnover. Case preparation and surgical case management utilizing the principles of aseptic technique are also demonstrated and practiced.
Prerequisites: Semester I courses

Semester III
SUR 201 Surgical Pharmacology and Anesthesia
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course introduces surgical pharmacology and anesthesia. Medications commonly used in surgery and the procedures for properly identifying, handling, preparing, and storing them are emphasized. Anesthetic agents and equipment, and induction, are also introduced.
Prerequisites: Semesters I and II courses

SUR 211 Endoscopic Principles and Procedures
Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0
This course explores endoscopic, minimally invasive, and robotic surgery. Other topics include the preparation, maintenance, required cleaning, and surgical procedures appropriate for each type of endoscope and the use of electrosurgery. The use of computers, lasers, robotics, and interventional radiology in the surgical setting is introduced.
Prerequisites: Semesters I and II courses

SUR 221 Basic Surgical Procedures
Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0
This course covers the basic surgical procedures used in the several areas of surgery, including general, obstetrics and gynecology, genitourinary, plastic and reconstructive, ophthalmic, ENT, and oral and maxillofacial. Topics addressed for each surgical specialty include related anatomy and terminology, common surgical procedures, pathophysiology, appropriate instrumentation, supplies, anesthesia method, patient positioning, prepping and draping, incision, basic procedural steps, complications, special medications, and specimen handling.
Prerequisites: Semesters I and II courses

SUR 255 Surgical Lab II
Total Course Hours: 120 (0 Theory, 120 Lab, 0 Extern) Semester Credits: 4.0
This course is a continuation of Surgical Lab I and provides opportunities to practice and refine skills in the pre-, intra-, and post-operative setting for basic surgical procedures. Skills addressed include proper handling of sharps and medications as well as patient positioning, prepping and draping, incision, basic procedural steps and room preparation and turnover for general, OB/GYN, GU, ophthalmic, ENT, oral-maxillofacial, and plastic and reconstructive procedures. Case preparation and surgical case management utilizing the principles of aseptic technique are also demonstrated and practiced.
Prerequisites: Semesters I and II courses

Semester IV
SUR 231 Advanced Surgical Procedures
Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0
This course covers advanced surgical procedures used in several areas of surgery, including orthopedic, peripheral vascular, thoracic and pulmonary, cardiac, neurosurgery, pediatric, and emergency trauma. Topics addressed for each surgical specialty include related anatomy and terminology, common surgical procedures, pathophysiology, appropriate instrumentation, supplies, anesthesia method, patient positioning, prepping and draping, incision, basic procedural steps, complications, special medications, and specimen handling.
Prerequisites: Semesters I, II, and III courses

SUR 241 Clinical Preparation
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course acts as a bridge from the didactic to the clinical portion of the program.
Prerequisites: Semesters I, II, and III courses

SUR 245 Professional Development
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course covers the skills required to transition into the workforce as an entry-level surgical technologist. Topics include goal setting, assertiveness, time management, decision-making, résumé writing, portfolio preparation, and employment skills.
Prerequisites: Semesters I, II, and III courses

SUR 255 Surgical Lab III
Total Course Hours: 120 (0 Theory, 120 Lab, 0 Extern) Semester Credits: 4.0
This course is a continuation of Surgical Lab II and provides opportunities to practice and refine skills in the pre-, intra-, and post-operative settings for advanced surgical procedures. Skills addressed include patient positioning, prepping and draping, incision, basic procedural steps and room preparation and turnover for orthopedic, peripheral vascular, thoracic and pulmonary, cardiovascular, neurosurgical, pediatric, and common trauma surgical procedures. Case preparation and surgical case management utilizing the principles of aseptic technique are also demonstrated and practiced.
Prerequisites: Semesters I, II, and III courses

Surgical Technology • Course Descriptions

Semester V

SUR 265 Certification Preparation

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is designed to prepare the student for the NBSTSA certification examination. A comprehensive review of the technical coursework, mock examinations, and test-taking strategies are covered.

Prerequisites: Semesters I, II, III, and IV courses

SUR 275 Clinical Practicum

Total Course Hours: 504 (0 Theory, 0 Lab, 504 Extern) Semester Credits: 11.0

This course provides students with the opportunity to apply learned theories and skills in a clinical setting. Under the supervision of a preceptor, students participate in the intraoperative stage of surgery and perform preoperative and postoperative duties. Course requirements include maintaining case records of participation in surgical procedures for documentation of the minimum 120 surgical procedures necessary for successful program completion. Upon completion of the term, entry-level proficiency in general surgery and specialty services is required.

Prerequisites: Semesters I, II, III, and IV courses

Veterinary Technician—El Paso Campus

Objective: To develop in students the intrapersonal and professional skills needed to perform as competent entry-level veterinary technicians through didactic instruction, hands-on laboratory practice, and clinical experiences. Among the topics covered in the curriculum are medical terminology, anatomy and physiology, examination techniques, and radiologic, dental, and surgical procedures as they relate to veterinary care.

Graduates of this program receive an Associate of Applied Science Degree. Graduates of accredited programs are eligible to take the Veterinary Technician National Examination (VTNE) and applicable state board examinations.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required. Refer to the program specific Prospective Student Handout for more information.

Veterinary Technician—El Paso • Course Descriptions

Semester I

CCB 115 Computer Basics
Total Course Hours: 15 (15 theory, 0 Lab, 0 Extern) Semester Credits: 1.0
Through demonstration and hands-on experience, students will gain a general understanding of computers. Hardware, software, Microsoft products, and internet use are explained.
Prerequisites: None

VTA 127 Comparative Veterinary Anatomy, Physiology, and Terminology
Total Course Hours: 60 (60 theory, 0 Lab, 0 Extern) Semester Credits: 4.0
An introductory study comparing the structures, functions, and disorders of the body systems of various domesticated animals and selected exotic animals. Students will develop their understanding of medical terminology to encompass common veterinary medical terms and abbreviations.
Prerequisites: None

VTA 130 Clinical Lab Procedures and Pathology
Total Course Hours: 75 (15 theory, 60 Lab, 0 Extern) Semester Credits: 3.0
This course is an investigation into the basic laboratory procedures to determine the presence of a variety of pathogens of importance in the veterinary field. The student will have the opportunity to demonstrate collection procedures. Topics include laboratory equipment, hematology, urine and fecal analysis, parasitology, and the basics of clinical microbiology. Assisting with necropsy is also introduced.
Prerequisites: None

VTA 132 Clinical Proficiency
Total Course Hours: 30 (0 theory, 30 Lab, 0 Extern) Semester Credits: 1.0
This course provides the student with opportunities to apply the concepts covered in VTA 127, VTA 130, and VTA 165. Application includes competency/performance testing in simulated and interactive modalities.
Prerequisites: None

VTA 165 Pharmacology and Principles of Anesthesia
Total Course Hours: 45 (45 theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides an introduction to the classification of medications, including classes and routes of administration and their effects on body systems. Instruction reviews the role of the veterinary assistant in assisting with the preparations for and restraint of an animal for anesthesia. Practice in pharmacological math is aided by a review of metric and conventional measurements and the use of dimensional analysis.
Prerequisites: None

Semester II

MT 100 Math Fundamentals
Total Course Hours: 30 (30 theory, 0 Lab, 0 Extern) Semester Credits: 2.0
This course reviews basic mathematical skills including whole numbers, fractions, decimals, proportions, ratios, percentages, combined applications, and measurement systems. It provides students with a solid foundation for higher math concepts.
Prerequisites: None

VTA 110 Office Procedures
Total Course Hours: 15 (15 theory, 0 Lab, 0 Extern) Semester Credits: 1.0
Students are introduced to facility types, paper and electronic record keeping, charting, client service and scheduling, OSHA safety regulations, and the role of the veterinary assistant in the veterinary clinic. This course emphasizes the importance of professionalism in communications with clients, coworkers, and potential employers.
Prerequisites: None

VTA 133 Clinical Proficiency
Total Course Hours: 30 (0 theory, 30 Lab, 0 Extern) Semester Credits: 1.0
This course provides the student with opportunities to apply the concepts covered in VTA 150, VTA 160 and VTA 170. Application includes competency/performance testing in simulated and interactive settings.
Prerequisites: None

VTA 150 Animal Life Stages, Nutrition, and Husbandry
Total Course Hours: 45 (45 theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course covers animal life stages from birth to old age and issues related to animal death. Special attention is given to preventive health care and the behavioral, dietary, housing, and social needs throughout the lifetime of the canine, feline, equine, and exotic species.
Prerequisites: None

VTA 160 Animal Nursing and Diagnostic Imaging
Total Course Hours: 75 (15 theory, 60 Lab, 0 Extern) Semester Credits: 3.0
This course covers the basics of animal nursing including restraint techniques, physical exam and vital sign monitoring, ear and eye care, wound care and bandaging, and the basics of first aid and emergency medicine for small animals. Also addressed is the role of the veterinary assistant in the safe use of and positioning for diagnostic imaging modalities.
Prerequisites: None

VTA 170 Aseptic Technique and Surgical Assisting
Total Course Hours: 60 (15 theory, 45 Lab, 0 Extern) Semester Credits: 2.5
This course trains the student in aseptic preparation of animals, personnel, instruments, and equipment for surgery. Topics include protocol for assisting surgeons in the operating room, descriptions of pre- and postoperative care, and assisting in a variety of basic procedures including animal dentistry.
Prerequisites: None

Semester III

CCM 111 Communications

Total Course Hours: 45 (45 theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with experience with the wide range of communication skills necessary for success in health professions. Verbal and nonverbal communication, technical and professional writing, speaking and listening critically, health literacy, evaluating and synthesizing material from diverse cultural sources and points of view, and other topics. Legal and ethical issues in communication are also addressed.

Prerequisites: Semesters I and II courses

MTH 129 Math Applications

Total Course Hours: 45 (45 theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with the fundamentals of college algebra, and includes common formulae and calculations used in applied settings. Topics include fractions, decimals, linear equations, basic statistics, and pharmaceutical math.

Prerequisites: Semesters I and II courses

PSY 102 Introduction to Psychology

Total Course Hours: 30 (30 theory, 0 lab, 0 Extern) Semester Credits: 2.0

This course introduces basic concepts in human psychology through an overview of the foundations of the discipline and a more in-depth look at contemporary approaches in the field. Among the many topics included are mental health, behavior, personality traits, life span development, social interactions, and various therapies used to treat psychological disorders.

Prerequisites: Semesters I and II courses

SCI 120 Foundations in Biology and Chemistry

Total Course Hours: 60 (60 theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course provides an introduction to the fundamentals of chemistry and various life sciences as they relate to veterinary technology. Topics include inorganic and organic chemistry, biochemistry, cellular biology, and the biology of various life processes. This course provides a foundation for applied coursework in veterinary technology.

Prerequisites: Semesters I and II courses

VTT 176 Introduction to Veterinary Technology

Total Course Hours: 25 (25 theory, 0 Lab, 0 Extern) Semester Credits: 1.5

This course presents the student with an introduction to veterinary science and the role of the credentialed veterinary technician on the veterinary team. Topics include the history of the field, scope of practice, ethical and legal issues, professionalism, and a survey of employment opportunities. This course provides the opportunity to learn and adopt methods and life skills that aid success in a professional degree program and the workplace and promote lifelong learning.

Prerequisites: Semesters I and II courses

VTT 242 Dentistry Techniques

Total Course Hours: 30 (15 theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course presents the tasks and techniques within the scope of practice of a veterinary technician. Included are examination, cleaning, scaling, polishing, and in some jurisdictions, extractions. Tooth anatomy and terminology is reviewed as well as the common veterinary dental diseases and disorders. Also addressed are protocols for veterinary dental radiography and assisting the DVM in advanced techniques.

Prerequisites: Semesters I and II courses

Semester IV

VTT 222 Food and Fiber Animal

Total Course Hours: 55 (45 theory, 10 Lab, 0 Extern) Semester Credits: 3.0

This course introduces the veterinary nursing student to livestock and animal science. This includes an overview of various segments of the livestock industry. Building on previous anatomy and physiology coursework, the primary focus of the course is the nursing and medicine of food animals. Coursework and lab exercises cover restraint, behavior, husbandry, nursing care, sampling techniques, bandaging, and radiography as well as medicine and a review of common surgeries of food and fiber species (bovine, caprine, ovine, camelid, and swine).

Prerequisites: Semesters I, II, and III courses

VTT 224 Diagnostic Imaging for Veterinary Technicians

Total Course Hours: 30 (15 theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course furthers the training in radiology, begun in veterinary assistantship, with advanced studies in screens, positioning, and contrast studies. Students will learn to utilize a portable radiology machine. The course introduces the student to basic ultrasound techniques and digital radiography.

Prerequisites: Semesters I, II, and III courses

VTT 226 Small Animal Nursing

Total Course Hours: 75 (15 theory, 60 Lab, 0 Extern) Semester Credits: 3.0

This course provides advanced training in various nursing procedures within the veterinary technician's scope of practice. Topics include catheterization, aspiration, centesis, endotracheal and gastric intubation, rectal and reproductive procedures, sensory organ exams and testing, and bandaging techniques.

Prerequisites: Semesters I, II, and III courses

VTT 232 Laboratory Animal Science

Total Course Hours: 35 (20 theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course provides an overview of the principles of laboratory animal research and the role of the veterinary technician in the husbandry and nursing of small mammalian species as well as participation in research activities. Students will work with selected species that may include mice, rats, guinea pigs and rabbits as well as other small mammals. The use of primates and nonmammalian species will be discussed.

Prerequisites: Semesters I, II, and III courses

VTT 236 Anatomy and Physiology for Veterinary Technicians
Total Course Hours: 60 (30 theory, 30 Lab, 0 Extern) Semester Credits: 3.0
This course provides an in-depth analysis of the anatomy and physiology of the domestic species, with focus on the cat and dog. In the lab sessions, students will identify anatomical features and demonstrate an understanding of body function. Necropsy technique is mandatory.
Prerequisites: Semesters I, II, and III courses

VTT 239 Laboratory Procedures for Veterinary Technicians
Total Course Hours: 75 (30 theory, 45 Lab, 0 Extern) Semester Credits: 3.5
This course focuses on diagnostic tests performed in the veterinary laboratory and includes discussion of various diseases and disorders of the body systems. Experience in bacteriology, endocrinology, hematology, serology, and parasitology is part of the curriculum.
Prerequisites: Semesters I, II, and III courses

Semester V
VTT 244 Pharmacology for Veterinary Technicians
Total Course Hours: 45 (45 theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course focuses on those pharmacological topics within the scope of the veterinary technician. Topics include a review of pharmaceutical math and a detailed examination of the physiology and chemistry of drug effects on the nervous system. Also presented is a discussion of the proper protocol for many injectable and inhalant anesthetics, analgesics, and anti-inflammatories. Chemotherapeutics, antimicrobial, antiparasitic, and euthanasia agents are also addressed.
Prerequisites: Semesters I, II, and III courses

VTT 246 Surgical Nursing for Veterinary Technicians
Total Course Hours: 70 (30 theory, 40 Lab, 0 Extern) Semester Credits: 3.0
In defining the veterinary technician's role in surgical nursing, the student will be exposed to the intricacies of the anesthesia machine and receive training in setting, adjusting, and maintaining the unit. The student will evaluate, medicate, anesthetize, prepare, and monitor a variety of surgical patients, as well as learn the protocol as a sterile scrub nurse. A review and demonstration of various monitoring equipment is provided, and the student will participate in several surgeries of various intensities.
Prerequisites: Semesters I, II, and III courses

VTT 252 Exotic Animal Medicine and Nursing
Total Course Hours: 30 (15 theory, 15 Lab, 0 Extern) Semester Credits: 1.5
This course presents an overview of the various exotic animals that are an increasing part of the pet population. The focus is on the anatomy, behavior, nutrition, diseases, and restraint of various reptilian, amphibian, and avian groups, as well as some of the exotic small mammals. Lab activities will include the restraint and physical examination of these species. Basic nursing techniques of these species are addressed.
Prerequisites: Semesters I, II, and III courses

VTT 254 Equine Medicine and Nursing
Total Course Hours: 60 (45 theory, 15 Lab, 0 Extern) Semester Credits: 3.5
This course introduces the veterinary nursing student to equine medicine and the role of the veterinary technician in the equine practice. Lecture and lab activities develop a more advanced understanding of equine anatomy and physiology and covers restraint, behavior, husbandry, nursing and sampling techniques, bandaging, and radiography. Content includes the common causes of lameness in the horse as well as the more commonly performed surgical procedures. Toxicological principles and the more common diseases and disorders of the horse will also be discussed.
Prerequisites: Semesters I, II, and III courses

VTT 256 Emergency Procedures
Total Course Hours: 40 (30 theory, 10 Lab, 0 Extern) Semester Credits: 2.0
This course covers the role of the veterinary technician in emergency procedures, both at an emergency clinic and at the veterinary hospital. Topics include assessment and triage, shock pathophysiology and treatment, trauma, CPCR review, toxicology, anesthetic and surgical emergencies, and the veterinary technician's role in maintenance of the veterinary emergency crash kit.
Prerequisites: Semesters I, II, and III courses

VTT 273 Clinical Proficiency f
Total Course Hours: 45 (0 theory, 45 Lab, 0 Extern) Semester Credits: 1.5
This course provides the student with opportunities to apply the concepts covered in VTT 246, 252, 254, and 256. Application includes competency/performance testing in simulated and interactive settings.
Prerequisites: Semesters I, II, and III courses

Externship and Seminar
VTT 262 Veterinary Technician Seminar
Total Course Hours: 15 (15 theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course is designed to prepare the learner for the Veterinary Technician National Examination (VTNE). Content includes a comprehensive review of program content and the opportunity to participate in a simulated VTNE exam.
Prerequisites: Semesters I through V courses

VTT 292 Externship
Total Course Hours: 240 (0 theory, 0 lab, 240 Extern) Semester Credits: 5.0
This course provides students with opportunities to apply professional skills learned in the classroom.
Prerequisites: Semesters I through V and all laboratory competencies

Veterinary Technician

Objective: To develop in students the personal traits and professional skills needed to perform as competent entry-level veterinary technicians (VT). The program provides students with knowledge of medical terminology, anatomy and physiology, examination techniques, and radiologic, dental, and surgical procedures as they relate to veterinary care.

Graduates of this program receive an Associate of Applied Science Degree. Graduates of accredited programs are eligible to take the Veterinary Technician National Examination (VTNE) and applicable state board examinations.

Admissions Requirements: In addition to the Admissions requirements and Transfer Credit criteria listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required. Applicants must provide evidence of a certificate/diploma from a veterinary assistant program and upon evaluation may successfully transfer 29 credits. Applicants with less than one year of experience as a veterinary assistant must have a GPA of 3.0.

Veterinary Technician • Course Descriptions

Specific courses delivered online may vary by campus. Refer to the Prospective Student Handout for information about delivery method for each course within this hybrid program.

CCM 111 Communications
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides the student with experience with the wide range of communication skills necessary for success in health professions. Verbal and nonverbal communication, technical and professional writing, speaking and listening critically, health literacy, evaluating and synthesizing material from diverse cultural sources and points of view, and other topics. Legal and ethical issues in communication are also addressed.
Prerequisites: None

MTH 129 Math Applications
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides the student with the fundamentals of college algebra, and includes common formulae and calculations used in applied settings. Topics include fractions, decimals, linear equations, basic statistics, and pharmaceutical math.
Prerequisites: None

SCI 120 Foundations in Biology and Chemistry
Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0
This course provides an introduction to the fundamentals of chemistry and various life sciences as they relate to veterinary technology. Topics include inorganic and organic chemistry, biochemistry, cellular biology, and the biology of various life processes. This course provides a foundation for applied coursework in veterinary technology.
Prerequisites: None

VTT 176 Introduction to Veterinary Technology
Total Course Hours: 25 (25 Theory, 0 Lab, 0 Extern) Semester Credits: 1.5
This course presents the student with an introduction to veterinary science and the role of the credentialed veterinary technician on the veterinary team. Topics include the history of the field, scope of practice, ethical and legal issues, professionalism, and a survey of employment opportunities. This course provides the opportunity to learn and adopt methods and life skills that aid success in a professional degree program and the workplace and promote lifelong learning.
Prerequisites: None

VTT 222 Food and Fiber Animal
Total Course Hours: 55 (45 Theory, 10 Lab, 0 Extern) Semester Credits: 3.0
This course introduces the veterinary nursing student to livestock and animal science. This includes an overview of various segments of the livestock industry. Building on previous anatomy and physiology coursework, the primary focus of the course is the nursing and medicine of food animals. Coursework and lab exercises cover restraint, behavior, husbandry, nursing care, sampling techniques, bandaging, and radiography as well as medicine and a review of common surgeries of food and fiber species (bovine, caprine, ovine, camelid, and swine).
Prerequisites: Professional Sequence I

VTT 224 Diagnostic Imaging for Veterinary Technicians
Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5
This course furthers the training in radiology, begun in veterinary assistantship, with advanced studies in screens, positioning, and contrast studies. Students will learn to utilize a portable radiology machine. The course introduces the student to basic ultrasound techniques and digital radiography.
Prerequisites: Professional Sequence I

VTT 226 Small Animal Nursing
Total Course Hours: 75 (15 Theory, 60 Lab, 0 Extern) Semester Credits: 3.0
This course provides advanced training in various nursing procedures within the veterinary technician's scope of practice. Topics include catheterization, aspiration, centesis, endotracheal and gastric intubation, rectal and reproductive procedures, sensory organ exams and testing, and bandaging techniques.
Prerequisites: Professional Sequence I

VTT 232 Laboratory Animal Science
Total Course Hours: 35 (20 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5
This course provides an overview of the principles of laboratory animal research and the role of the veterinary technician in the husbandry and nursing of small mammalian species as well as participation in research activities. Students will work with selected species that may include mice, rats, guinea pigs, and rabbits as well as other small mammals. The use of primates and nonmammalian species will be discussed.
Prerequisites: Professional Sequence I

Veterinary Technician • Course Descriptions

VTT 234 Laboratory Procedures for Veterinary Technicians
Total Course Hours: 65 (30 Theory, 35 Lab, 0 Extern) Semester Credits: 3.0
This course focuses on diagnostic tests performed in the veterinary laboratory and includes discussion of various diseases and disorders of the body systems. Experience in bacteriology, endocrinology, hematology, serology, and parasitology is part of the curriculum.
Prerequisites: Professional Sequence I

VTT 236 Anatomy and Physiology for Veterinary Technicians
Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0
This course provides an in-depth analysis of the anatomy and physiology of the domestic species, with focus on the cat and dog. In the lab sessions, students will identify anatomical features and demonstrate an understanding of body function. Necropsy technique is mandatory.
Prerequisites: Professional Sequence I

VTT 242 Dentistry Techniques
Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5
This course presents the tasks and techniques within the scope of practice of a veterinary technician. Included are examination, cleaning, scaling, polishing, and in some jurisdictions, extractions. Tooth anatomy and terminology is reviewed as well as the common veterinary dental diseases and disorders. Also addressed are protocols for veterinary dental radiography and assisting the DVM in advanced techniques.
Prerequisites: Professional Sequence I

VTT 244 Pharmacology for Veterinary Technicians
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course focuses on those pharmacological topics within the scope of the veterinary technician. Topics include a review of pharmaceutical math and a detailed examination of the physiology and chemistry of drug effects on the nervous system. Also presented is a discussion of the proper protocol for many injectable and inhalant anesthetics, analgesics, and anti-inflammatories. Chemotherapeutics, antimicrobial, antiparasitic, and euthanasia agents are also addressed.
Prerequisites: Professional Sequence I

VTT 246 Surgical Nursing for Veterinary Technicians
Total Course Hours: 70 (30 Theory, 40 Lab, 0 Extern) Semester Credits: 3.0
In defining the veterinary technician's role in surgical nursing, the student will be exposed to the intricacies of the anesthesia machine and receive training in setting, adjusting, and maintaining the unit. The student will evaluate, medicate, anesthetize, prepare, and monitor a variety of surgical patients as well as learn the protocol as a sterile scrub nurse. A review and demonstration of various monitoring equipment is provided, and the student will participate in several surgeries of various intensities.
Prerequisites: Professional Sequence I

VTT 248 Clinic Surgery and Lab
Total Course Hours: 15 (0 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5
This course provides opportunities for the students to advance their experience with surgical and anesthetic procedures and protocols through observation and applied practice. Students will deepen their understanding of laboratory and surgical procedures from assessment to follow-up care. Students will practice a variety of lab skills appropriate to their level of study.
Prerequisites: Professional Sequence I

VTT 252 Exotic Animal Medicine and Nursing
Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5
This course presents an overview of the various exotic animals that are an increasing part of the pet population. The focus is on the anatomy, behavior, nutrition, diseases, and restraint of various reptilian, amphibian, and avian groups as well as some of the exotic small mammals. Lab activities will include the restraint and physical examination of these species. Basic nursing techniques of these species are addressed.
Prerequisites: Professional Sequence I

VTT 254 Equine Medicine and Nursing
Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5
This course introduces the veterinary nursing student to equine medicine and the role of the veterinary technician in the equine practice. Lecture and lab activities develop a more advanced understanding of equine anatomy and physiology and covers restraint, behavior, husbandry, nursing and sampling techniques, bandaging, and radiography. Content includes the common causes of lameness in the horse as well as the more commonly performed surgical procedures. Toxicological principles and the more common diseases and disorders of the horse will also be discussed.
Prerequisites: Professional Sequence I

Veterinary Technician • Course Descriptions

VTT 256 Emergency Procedures
Total Course Hours: 40 (30 Theory, 10 Lab, 0 Extern) Semester Credits: 2.0
This course covers the role of the veterinary technician in emergency procedures, both at an emergency clinic and at the veterinary hospital. Topics include assessment and triage, shock pathophysiology and treatment, trauma, CPCR review, toxicology, anesthetic and surgical emergencies, and the veterinary technician's role in maintenance of the veterinary emergency crash kit.
Prerequisites: Professional Sequence I

VTT 258 Clinic Surgery and Lab
Total Course Hours: 30 (0 Theory, 30 Lab, 0 Extern) Semester Credits: 1.0
This course provides opportunities for the students to advance their experience with surgical and anesthetic procedures and protocols through observation and applied practice. Students will deepen their understanding of laboratory and surgical procedures from assessment to follow-up care. Students will practice a variety of lab skills appropriate to their level of study.
Prerequisites: Professional Sequence I

VTT 262 Veterinary Technician Seminar
Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0
This course is designed to prepare the learner for the Veterinary Technician National Examination (VTNE). Content includes a comprehensive review of program content and the opportunity to participate in a simulated VTNE exam.
Prerequisites: Professional Sequences I through V

VTT 291 Externship
Total Course Hours: 225 (0 Theory, 0 Lab, 225 Extern) Semester Credits: 5.0
This course provides students with opportunities to apply professional skills learned in the classroom.
Prerequisites: Professional Sequences I through V and all laboratory competencies

HST 205 Nevada History and US Constitution (Las Vegas Campus Only)
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
A survey of the history of the state of Nevada with focus on mining, gaming, government and recent developments in population expansion. The course will review the Nevada State Constitution and legal ramifications. The essentials of the US Constitution will also be examined. The course is designed to meet Nevada History/US Constitution associate degree requirements.
Prerequisites: None

After working at an animal shelter for about 10 years, I realized I wanted to become a veterinary technician. I did my research online and found that PMI's Veterinary Technician Program had a good reputation, and their morning classes worked perfectly with my schedule. I was able to be a single mom, go to classes in the morning, and work in the afternoon. I had previous degrees that I didn't use, and I've always enjoyed learning, but PMI's program was very accelerated. I learned so much so fast. My instructors were great and gave us really good feedback. I realize I was a bit of a late bloomer in deciding to go back to school at age 34, but I'm so glad I did.

During my externship, I worked at Veterinary Specialty Center where I got great experience ... and a job! I recently became the internal medicine lead technician. I love my job in internal medicine, and I'm always learning. In fact, I am working toward my veterinary technician specialty license and spend my vacation time in Mexico to participate in spay and neuter clinics. I have to say, it feels good to be surrounded by these graduates because I know they are well-trained and knowledgeable. This program really does set you up for success.

Joanna Horne
Associate Degree, Veterinary Technician, Seattle Campus

Bachelor of Science in Respiratory Therapy

Objective: To offer the highest quality education that fosters critical thinking, encourages professional leadership and development, and inspires a strong appreciation of ethical values and cultural diversity. A respiratory therapist entering the program will acquire the skills and knowledge above what is typically attained at the associate degree level. Graduates of entry into the respiratory care professional practice degree programs will gain additional knowledge, skills, and attributes in leadership, management, education, research, and/or advanced clinical practice that will enable them to meet their current professional goals and prepare them for practice as advanced degree respiratory therapists.

Graduates of this program receive a Bachelor of Science Degree.

Admissions Requirements: Admissions Requirements: Applicants to this degree completion program must have graduated from a CoARC-accredited Entry into Respiratory Care Professional Practice degree program and be a registered respiratory therapist (RRT) by the National Board for Respiratory Care (NBRC) prior to admission. Admission to the program requires that an applicant possess a high school diploma or recognized equivalency and have completed a total of 71 semester credits of specific coursework at the postsecondary level. The 71 transfer credits shall consist of 15 general education, 44 respiratory therapy technical, and 12 related credits. Transfer credits into this program must meet the following conditions: awarded by a nationally or regionally accredited institution; grade of "C" or better; and numbered 100 and above. General education transfer credits are required to be from a broad sampling of various educational experiences including arts and humanities, business, information systems, social sciences, or natural sciences. See additional Admissions and Transfer Credit requirements in the Prospective Students section of this catalog.

Bachelor of Science in Respiratory Therapy • Course Descriptions

Semester I

ENG 320 Advanced College Writing

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course builds upon basic English composition to create a strong foundation for academic and professional writing. This course enhances students' analytical reading and writing skills appropriate to one's professional field. Through instruction and practice in the writing process, research and information literacy, APA writing style, and connecting writing and critical thinking, students will hone their confidence and competence in making writing decisions for audience, purpose, and context.

Prerequisites: None

CPT 301 Microcomputer Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course prepares students to utilize Windows-based applications within the Windows environment. Through a hands-on approach, students will achieve advanced application knowledge of Windows, word processing, presentation software, and spreadsheets.

Prerequisites: None

BUS 220 Health Care Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores a wide variety of health care settings, from hospitals to nursing homes and clinics. Important issues in health care management, such as ethics, cost management, strategic planning and marketing, information technology, and human resources are explored.

Prerequisites: None

SPA 210 Spanish for the Medical Professional

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course will focus on the simple phrases, terminology, and pronunciation necessary to communicate with Spanish-speaking clients in a health care setting. Students will also examine cultural and social factors that may impact communication in a health care setting.

Prerequisites: None

Semester II

MTH 315 Statistical Concepts

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course introduces students to basic statistical concepts and statistical reasoning. Content encompasses core concepts of descriptive and inferential statistics with exploration of descriptive measures, graphical displays of data, sampling, distribution, measures of association, probability, hypothesis testing, confidence intervals, and linear regression. Common statistical tests, such as z-tests and Pearson correlation will be introduced. Students will practice statistical reasoning in real-world contexts.

Prerequisites: ENG 320 Advanced College Writing and CPT 301 Microcomputer Applications

PHI 301 Critical Thinking

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course examines the components of and barriers to critical thinking. Students will examine premises and fallacies in various types of arguments. Students will evaluate components of persuasive communications.

Prerequisites: ENG 320 Advanced College Writing and CPT 301 Microcomputer Applications

RSH 350 Introduction to Evidence-Based Practice

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides a comprehensive overview of evidence-based practice (EBP) and the real-world application of research evidence. Emphasis is placed on developing practical skills that will enable students to find, read, and understand published research. Essential topics include developing a research question, performing evidence searches, analyzing research studies, and determining value and usefulness of evidence in practice.

Prerequisite or Corequisites: ENG 320 Advanced College Writing, CPT 301 Microcomputer Applications, and MTH 315 Statistical Concepts

HCA 310 Health Care Law and Compliance 3

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Health care law and compliance is important because of its financial and emotional impact on health care professionals, patients, and health care facilities. This course focuses on legal and compliance issues that directly affect employer and employee. Content provides guidance on risk management techniques and reporting that can help mitigate noncompliance.

Prerequisites: None

Semester III

HCA 460 Public Health

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an overview of the field of public health, with an emphasis on the role of public health agencies in resolving community health problems. Students will examine social, political, economic, geographic, demographic, and physiological factors affecting health care status of communities and individuals.

Prerequisites: ENG 320 Advanced College Writing and CPT 301 Microcomputer Applications

RES 325 Polysomnography
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course is a study of the clinical and technical aspects of polysomnography. Topics address normal and abnormal sleep physiology and sleep disorders. Students learn the basics of polysomnography, including instrumentation and recording technology, methodology, and the inner workings of a sleep laboratory. The course also addresses patient-technologist interaction and administrative and safety issues.
Prerequisites: ENG 320 Advanced College Writing and CPT 301 Microcomputer Applications

RES 440 Home Health
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course is an introduction to home health and its specific issues. Topics include discharge planning, case management, reimbursement and Medicare. Students will be introduced to outcome-based home care and disease management.
Prerequisites: ENG 320 Advanced College Writing and CPT 301 Microcomputer Applications

RES 450 Leadership in Respiratory Care
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course will equip respiratory care practitioners with a comprehensive understanding of current principles and practices of leading a respiratory care department. The course addresses the unique challenges and responsibilities associated with managing resources, efficient workflows, and integrating technology innovations in respiratory care. In the application of leadership principles, learners acquire the ability to navigate legal, ethical, and accreditation considerations in the administration of a respiratory care department.
Prerequisites: ENG 320 Advanced College Writing, CPT 301 Microcomputer Applications, and BUS 220 Health Care Management

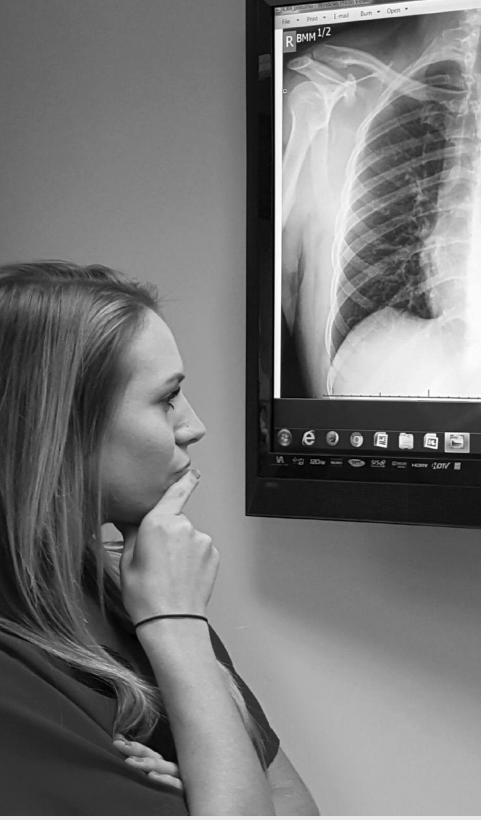
EDU 450 Education Foundations
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides learners with an understanding of educational theory and concepts in the context of teaching within the allied health field. Exploration of various adult learning theories and applications in content design, instructional methods, and assessment prepares allied health professionals to elevate their teaching skills in diverse settings including patient and community education, staff development, clinical education, and academics. Learning to create engaging and effective learning experiences is accomplished through discussion, research, projects, and real-world applications.
Prerequisites: ENG 320 Advanced College Writing, CPT 301 Microcomputer Applications

Semester IV
HCA 430 Patient Information and Management
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
Patient information management is important because of the integral role a health care professional has within the team. It is essential for the health care professional to provide all members of the team with a thorough patient record to ensure quality patient care.
Prerequisites: ENG 320 Advanced College Writing and CPT 301 Microcomputer Applications

HCA 470 Quality Management
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides the student with a solid foundation in quality management and teamwork within the health care environment. Quality management is important to ensure the proper functioning of equipment and compliance with various standards. Health care professionals should have an understanding of the activities and their role in leading the quality management process.
Prerequisites: ENG 320 Advanced College Writing and CPT 301 Microcomputer Applications

RES 420 Disease Management and Wellness Promotion
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course is designed for respiratory care professionals seeking to elevate their skills and knowledge in a specialized role of disease management. The course focuses on strategies for chronic disease management and wellness promotion, including patient education and counseling, adapting interventions across the lifespan using evidence-based research, and fostering a collaborative approach to managing chronic conditions and promoting healthy lifestyles. The course prepares learners to navigate the challenges and opportunities of disease management in the evolving landscape of respiratory health care.
Prerequisites: ENG 320 Advanced College Writing and CPT 301 Microcomputer Applications

RES 490 Professional Capstone
Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0
This is a capstone course focusing on the synthesis of professional knowledge and critical thinking skills in preparation for professional advancement and lifelong learning. This course provides students with an opportunity to identify and develop research skills necessary to create a solution for an existing health care issue. The course content is geared to increase and disseminate intellectual inquiry, information literacy, and the use of scholarly research methods.
Prerequisites: Semesters I, II, and III courses



At a Glance

Program Type: Associate Degree
Delivery Method: Online
Semester Credits: 95.0

Program Length	Total
Program Hours	2,676
Program Weeks Transfer hours: 1,614 Program-specific hours: 1,062	80
Program Semesters (16 weeks per semester)	5

Campus Locations

The Online programs are delivered from Tucson, AZ.

Radiography—Bridge

Objective: To develop in students the personal and professional skills needed to perform as competent entry-level radiologic technologists. Students will be presented with information in anatomy and physiology, methods of patient care, medical terminology, radiographic techniques, and communications.

Graduates of this program receive an Associate of Applied Science Degree and are qualified to apply to take the American Registry of Radiologic Technologists (ARRT) examination for certification.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, applicants must document a minimum of 1,599 hours of clinical experience in radiologic sciences. In addition, applications must document graduation from one of the following: a United States military program in radiologic sciences; a JRCERT-accredited radiologic sciences program; a foreign program in radiologic sciences equivalent in length to one year or more of college coursework; or an approved or licensed limited scope radiography program. One year of college coursework is defined as 30 credit hours. Students are granted 35.5 credits for previous radiologic sciences education and experience. Refer to the Transfer Credit information in the Prospective Studentssection of this catalog.

Radiography—Bridge • Course Descriptions

Semester I

CCM 112 Communications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course introduces foundational concepts of human communication and enables students to develop their awareness and effectiveness as communicators in social, professional, and interpersonal situations. Students explore verbal and nonverbal communication, communication styles, speaking and listening skills, and cultural factors that influence communication. Basic internet research skills, source citation, and effective interpretation of information are also addressed.

Prerequisites: None

PSY 140 Interpersonal Relations

Total Course Hours: 30 (30 Theory 0 Lab, 0 Extern) Semester Credits: 2.0

This course explores the psychological nature of humans and their interactions. Students will gain an understanding of basic psychological concepts as well as an awareness of self and how these elements provide a foundation for the interaction of the individual within the social and health care environments. Topics include but are not limited to perception, adaptation, communication, group processes, and the impact of health on behavior.

Prerequisites: None

MTH 210 Math Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with the fundamentals of college algebra. Mathematical operations covered include fractions, decimals, algebraic equations, basic statistics, word problems, and graphing.

Prerequisites: None

BIO 134 Anatomy and Physiology I

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits:4.0

The objective of this course is to provide the student with knowledge of the structure and function of the human body. Cells and tissues will be described, and organs will be discussed as components of their respective systems. Course content includes the structures and functions of the integumentary and musculoskeletal systems.

Prerequisites: None

Semester II

RAD 112 Positioning I

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course covers basic terminology, anatomy, and radiographic procedures.

Prerequisites: BIO 134 Anatomy and Physiology I

BIO 144 Anatomy and Physiology II

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

A continuation of BIO 134, this course content includes the structure and function of the endocrine, nervous, cardiovascular (including blood, heart, blood vessels, and circulation), lymphatic, respiratory, digestive, urinary, and reproductive systems.

Prerequisites: BIO 134 Anatomy and Physiology I

RAD 122 Positioning II

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is a continuation of RAD 112 and covers basic terminology, anatomy, and radiographic procedures.

Prerequisites: RAD 112 Positioning I, BIO 134 and BIO 144 (Anatomy and Physiology I and II)

CLE 112 Medical Law and Ethics

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

Students are provided an overview of ethics and the law as they apply to medical professions and practice. Topics include scope of practice, legal issues, ethical considerations, patient rights, informed consent, standards of care, documentation, and workplace issues, including employment discrimination.

Prerequisites: None

Semester III

RAD 132 Positioning III

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is a continuation of RAD 112 and RAD 122 and covers basic terminology, anatomy, and radiographic procedures. Students learn advanced positioning skills for age-specific populations.

Prerequisites: RAD 112 Positioning I, RAD 122 Positioning II, BIO 134 and BIO 144 (Anatomy and Physiology I and II)

RAD 134 Methods of Patient Care

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Students are instructed in basic patient care skills as they apply to radiologic technology. Emphasis is placed on safety, infection control, aseptic techniques, administration of contrast media, venipuncture, pharmacology, patient assessment, care of the critical patient and emergency care, and the care of tubes, catheters and vascular lines. In California, this course will provide the education and training for venipuncture certification.

Prerequisites: None

Radiography—Bridge • Course Descriptions

RAD 128 Physics
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides an in-depth analysis of radiologic physics. Some of the topics and principles covered include atomic structure, electricity, electromagnetism, equipment operation and maintenance, x-ray production, and x-ray interactions.
Prerequisites: MTH 210 Math Applications

RAD 212 Advanced Radiographic Imaging and Special Procedures
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course presents radiography skills and equipment used in various imaging procedures and advanced modalities. Topics include but are not limited to cardiovascular and interventional radiography, computed tomography imaging, magnetic resonance imaging, mammography, bone densitometry, ultrasound, nuclear medicine and radiation oncology.
Prerequisites: RAD 112 Positioning I, RAD 122 Positioning II, RAD 132 Positioning III

Semester IV
RAD 138 Principles of Exposure
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course covers the factors that affect the diagnostic quality of radiographic images. Topics covered include image acquisition, digital imaging systems, image processing, beam limitation, grids, contrast, receptor exposure, spatial resolution, and structural considerations.
Prerequisites: RAD 128 Physics, RAD 112 Positioning I

RAD 238 Pathology
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides an overview of radiographic pathology. Topics cover pathologies of the following body systems: musculoskeletal, respiratory, gastrointestinal, hepatobiliary, urinary, hematopoietic, cardiovascular, nervous, endocrine, and reproductive systems. Traumatic injuries are also addressed.
Prerequisites: Semesters I, II, and III courses

RAD 232 Radiography II
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course builds upon the foundations of classroom theory and practical experience in the field in the critique of radiographic image quality, with an emphasis on image analysis.
Prerequisites: RAD 128 Physics, RAD 112 Positioning I, RAD 122 Positioning II, and RAD 132 Positioning III

RAD 142 Radiographic Biology
Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0
This course provides the student with instruction on x-ray interactions with matter, radiation effects on the molecular and cellular levels, acute and long-term radiation responses, and radiation protection principles.
Prerequisites: RAD 128 Physics, BIO 134 and BIO144 (Anatomy and Physiology I and II)

Semester V
RAD 248 Radiography III
Total Course Hours: 90 (90 Theory, 0 Lab, 0 Extern) Semester Credits: 6.0
This course is designed to prepare the student for examination for certification by the American Registry of Radiologic Technologists (ARRT).
Prerequisites: Semesters I, II, III, and IV courses

RAD 256 Clinical Externship IV
Total Course Hours: 252 (0 Theory, 0 Lab, 252 Extern) Semester Credits: 5.5
This course provides the student with clinical experience under the supervision of clinical staff and faculty. Students will develop clinical competence by performing a variety of radiographic procedures on a diverse patient population. Student learning and competence will be determined in part through frequent critique and evaluation, as well as specific formative and summative assessment tools. Students are expected to demonstrate the clinical skill and competence as required of an entry-level radiographer.
Prerequisites: Semesters I, II, III, and IV courses

Licensure Determination Disclosure
Certificate Programs

In compliance with 34 CFR 668.43 Pima Medical Institute has made a reasonable effort to determine graduate eligibility for licensure in all states/territories for programs designed and advertised as leading to licensure. The chart below lists PMI programs and states/territories where the curriculum meets licensure requirements and states/territories where the curriculum does not meet licensure requirements. All consumers should be advised that due to the frequent changes to statutes, rules, and regulations PMI cannot guarantee licensure based on the lists below.

Program	Program does not lead to licensure or Licensure Not Required	Meets Licensure Requirements	Does Not Meet Licensure Requirements	Notes
Advanced Emergency Medical Technician		Nevada	Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming, American Samoa, Guam, N. Mariana Islands, Puerto Rico, US Virgin Islands	Applicants to this program must be physically located in the state of Nevada. Applicants located outside of Nevada will not be eligible for admission to the AEMT program. Graduates of this program are eligible to sit for the National Registry of Advanced Emergency Medical Technicians (NRAEMT) Credentialing Examination at the AEMT level. Once the NRAEMT credential and state licensure are obtained, graduates may be eligible for licensure transfer and/or state reciprocity. Contact information for State Licensing Boards in which the PMI program Does Not Meet Licensure Requirements can be found below: https://pmi.edu/wp-content/uploads/2025/05/State-Licensing-Board-Contact-Information_AEMT.pdf
Dental Assistant	Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Kansas, Kentucky, Louisiana, Maine, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Texas, US Virgin Islands, Utah, Vermont, Virginia, West Virginia, Wisconsin, Wyoming	California *(Chula Vista and San Marcos Programs ONLY)*, District of Columbia (Level I), Guam, N. Mariana Islands, Tennessee, Washington	California⁺, Iowa, Massachusetts, Montana**, New York, American Samoa, Puerto Rico	⁺Graduates from DA programs at the following campuses are not eligible for licensure in the state of California: Mesa, Phoenix, Tucson, Aurora, Colorado Springs, Denver, Las Vegas, Albuquerque, El Paso, Houston, San Antonio, Renton, and Seattle ** *The State of Montana does not have licensure requirements for this profession; however, regulations prohibit hiring of non-CODA* ***(Commission on Dental Accreditation)*** *trained Dental Assistants.* Contact information for State/Territory Licensing Boards in which the PMI program Does Not Meet licensure requirements or Undetermined can be found at https://pmi.edu/wp-content/uploads/2022/01/State-Licensing-Board-Contact-Information_DA.pdf

Occupational Therapy Assistant		All States/Territories		Graduates of the OTA program are eligible to apply to take the National Certification Examination for Occupational Therapy Assistant (COTA) administered by the National Board for Certification in Occupational Therapy (NBCOT).
Paramedic		Arizona*, Nevada* Alabama, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, Washington DC, West Virginia, Wisconsin, Wyoming	Alaska, New York, Oregon, American Samoa, Guam, N. Mariana Islands, Puerto Rico, US Virgin Islands	*The Paramedic program is a hybrid program offered at the Las Vegas campuses and available to residents of Nevada, and meets requirements for licensure and employment in Nevada. While there are online components, this program requires on-ground attendance at the campus at which the student is enrolled and cannot be completed solely via distance education. Graduates of the Paramedic program are eligible to apply to take the National Registry of Emergency Medical Technicians (NREMT) certification examination at the paramedic level. Contact information for State Licensing Boards in which the PMI program Does Not Meet Licensure Requirements can be found at: https://pmi.edu/wp-content/uploads/2022/01/State-Licensing-Board-Contact-Info-PARA.pdf
Physical Therapist Assistant		All States/Territories		Graduates of PMI PTA programs are eligible to apply to take the National Physical Therapy Examination for Physical Therapist Assistants (NPTE-PTA) which is administered by the Federation of State Boards of Physical Therapy (FSBPT).
Radiography		All States/Territories		Graduates of PMI RAD programs are eligible to apply to take the American Registry of Radiologic Technologists (ARRT) examination for certification.
Respiratory Therapy		All States/Territories		Graduates of PMI RT programs are eligible to apply to take the National Board for Respiratory Care Therapist Multiple-Choice (TMC) Examination. Those who meet the threshold on the TMC are eligible to take the Clinical Simulation Examination (CSE) to obtain the Registered Respiratory Therapist (RRT) credential.

Program	Program does not lead to licensure or Licensure Not Required	Meets Licensure Requirements	Does Not Meet Licensure Requirements	Notes
Surgical Technology	Alabama, Alaska, Arizona, California, Connecticut, Delaware, Florida, Georgia, Hawaii, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Mexico, North Carolina, Ohio, Rhode Island, South Dakota, Utah, Vermont, Washington DC, West Virginia, Wisconsin, Wyoming, US Virgin Islands, American Samoa, Guam, N. Mariana Islands, Puerto Rico	Arkansas, Colorado, Idaho, Illinois, Indiana, Massachusetts, Nevada, New Jersey, New York, North Dakota, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, Washington		Graduates of PMI ST programs are eligible to apply to take the Certified Surgical Technologist (CST ®) exam administered by the National Board of Surgical Technology and Surgical Assisting (NBSTSA).
Veterinary Technician	Arizona, District of Columbia, Florida, Massachusetts, New Hampshire, New Jersey, Rhode Island, US Virgin Islands, Utah, Vermont, Wyoming	Alabama, Alaska, Arkansas, California, Colorado, Connecticut, Delaware, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Puerto Rico, South Carolina, South Dakota, Tennessee, Texas, Virginia, Washington, West Virginia, Wisconsin	American Samoa, Guam, N. Mariana Islands	Graduates of PMI VTT programs are eligible to apply to take the Veterinary Technician National Examination (VTNE) and applicable state board examinations. Contact information for State Licensing Boards in which the PMI program Does Not Meet licensure requirements can be found at: https://pmi.edu/wp-content/uploads/2022/08/Licensing-Board-Contact-Info-VTT.pdf

Licensure Determination Disclosure
Nursing Programs

In compliance with 34 CFR 668.43 Pima Medical Institute has made a reasonable effort to determine graduate eligibility for licensure in all states/territories for programs designed and advertised as leading to licensure. The chart below lists PMI programs and states/territories where the curriculum meets licensure requirements and states/territories where the curriculum does not meet licensure requirements. All consumers should be advised that due to the frequent changes to statutes, rules, and regulations PMI cannot guarantee licensure based on the lists below.

Program	Program does not lead to licensure or Licensure Not Required	Meets Licensure Requirements	Does Not Meet Licensure Requirements	Notes
Nursing Assistant/Aide (certificate)		Arizona, Colorado, Florida, Michigan, New Mexico, Texas	Alaska Alabama, Arkansas, California, Connecticut, Delaware, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Utah, Vermont, Virginia, Washington, Washington D.C, West Virginia, Wisconsin, Wyoming, American Samoa, Guam, N. Mariana Islands, Puerto Rico, US Virgin Islands	*this is an on-ground program available to residents of Arizona, Colorado, and Texas and meets licensure/certification requirements in those states. After licensure is obtained in the state (AZ, CO, or TX) transfer of licensure may be available via state reciprocity compacts. Prospective students and current students are strongly encouraged to contact the state professional licensing board or similar regulatory body in the state(s) where they plan to work to determine licensure requirements before enrolling in a program. State professional licensing board contact information can be found at: https://pmi.edu/wp-content/uploads/2022/01/State-Licensing-Board-Contact-Info-NA-Programs.pdf
Practical Nursing (PN) (certificate)		Colorado, New Mexico	Alabama, Alaska, Illinois, Arizona, Arkansas, California, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, Washington D.C., West Virginia, Wisconsin, Wyoming, American Samoa, Guam, N. Mariana Islands, Puerto Rico, US Virgin Islands	*The Albuquerque program is a hybrid program available to residents of New Mexico. The Albuquerque program is approved by the New Mexico Board of Nursing. While there are online components, this program requires on-ground attendance at the campus at which the student is enrolled and cannot be completed solely via distance education. *The Aurora program is an on-ground program available to residents of Colorado. The Aurora program is approved for licensure by the Colorado State Board of Nursing. After licensure is obtained in the state (CO or NM), transfer of licensure may be available via state reciprocity compacts. Prospective students and current students are strongly encouraged to contact the state professional licensing board or similar regulatory body in the state(s) where they plan to work to determine requirements before enrolling in a program. State professional licensing board contact information can be found at: https://pmi.edu/wp-content/uploads/2022/01/State-Licensing-Board-Contact-Info-PN-Programs.pdf

State Licensure Determination Disclosure
Online Programs

In compliance with 34 CFR 668.43 Pima Medical Institute has determined graduate eligibility for licensure in all states for programs designed and advertised as leading to licensure. The chart below lists PMI programs and states where the curriculum meets licensure requirements and states where the curriculum does not meet licensure requirements. All consumers should be advised that due to the frequent changes to state statutes, rules, and regulations PMI cannot guarantee licensure based on the lists below.

Online Certificate Program

Program	Program does not lead to licensure or Licensure Not Required	Meets Requirements	Does Not Meet Requirements	Notes
Medical Administrative Assistant (MAA)	Licensure is not required for employment in any states/territories.			
Computed Tomography (CT)		Alabama, Alaska, Arizona, Arkansas, California, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Pennsylvania, Rhode Island, South Carolina, South Dakota, Texas, Utah, Virginia, Washington, West Virginia, Wyoming	Colorado, Massachusetts, Michigan, Nevada, New Mexico, North Carolina, Oregon, Tennessee, Wisconsin, Vermont, American Samoa, Guam, N. Mariana Islands, Puerto Rico, US Virgin Islands	*Applicants to this program must hold a current American Registry of Radiologic Technologists (ARRT) registration as a radiologic technologist. Applicants must also document current employment as a radiologic technologist and the employer's intention to cross-train the applicant as a CT. The CT program does not typically enroll applicants that are physically located in states/territories in which the curriculum does not meet licensure requirements. Contact the program for more information. Contact information for State/Territory Licensing Boards in which the PMI program Does Not Meet licensure requirements can be found at https://pmi.edu/online-programs/certificate/computed-tomography/

Online Associate Degree Programs

Program	Program does not lead to licensure or Licensure Not Required	Meets Requirements	Does Not Meet Requirements	Notes
